(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

In my opinion the function of management and function of project are inter-related to each other. Function of project management are planning, organizing, leading, and controlling that managers perform to accomplish business goals, and function of project means estimating, scheduling, budgeting, forecasting, and performance measurement, evaluation and correction. The functions activities span across all project phases.

Am providing according to my understanding and a little research

Thank you in advance DR
