I have met leader who impacted on me negatively, his style is '**Autocratic leadership style**'. This leadership style he likes commanding and he is very focus on the result, no matter what, why I choose him because he put the team under high stress, from my opinion this kind of leader can be only effective only on emergency.

The traits and style of my leader, his characterized by individual control over all decisions and little input from group members and make choices based on his ideas and judgments. Why I select this style for him because he can cause poor moral on the team.

My previous job was in international company, I have met leader who impacted on me negatively, during the time when, I was in his team, he gave us tasks and he wants us to complete it in one day, although that kind of tasks require months to accomplished, also he keeps putting members of his team feels uncomfortable, the employees work by fear of punishment, and that make me look for another job.

I would like to describe my leader ships style " Affiliative Leadership Style" this style make connection, and harmony between team, and that will Creates effective teams, and will reduce stress on the team, also will Offers a clear chain of command or oversight.
