(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

The management is practiced in organizations, and there is no existence of management without the organizations. the organizations highly need the management because the administration will provide the necessary leadership to direct the efforts of workers towards the goal and practice the various functions for the management planning, organizing, directing and controlling to make sure reaching the goal with the best way and the lowest cost . but that does not mean the organization cannot function without management. sometimes it can work without management and may achieve it's goals, but the possibilities of not achieving the goals greatly exceed the probabilities of achieving them, as well as not ensuring that the goals are achieved by the best way and the lowest cost.
