مشروع تركيب أجهزة GPRS على عدادات المياه الميكانيكية لنقل القراءة

This real project I worked in, it is to fixing GPRS device on mechanic meters to send their reading to serval of our organization and link them with billing system.

I was project manager and I will speak about my manage style (democratic style) and how can I work with conflicts for this project.

Introduction:

There are more kind of leadership style and may be face one of them in your organization,

Here I want to make searching about democratic style because I like this style and I want to become like that.

Definition of democratic style :

The democratic leadership look at every membership in the team as an important member and hearing from every on and let every on of the team to sharing in making design also he focus on principality for person not on his position however when he ask or sharing the other from his team in his design he see his self the final principal about the ongoing work for project.

In fact, he know that the work in the organization is cooperation work but he exactly know he will face all responses or feedback the design.

That not mean just the team will sharing leadership to chose his design , also they will sharing his vision of the organization and give more advices to improve level its work with leave last design for leadership.

One of kind of leadership may put principality for a small group (team management)

Instead of stay for one person.

In addition, democratic style may help employers to let him friends and build relations between them , and support them to fell happiness when they see their sharing involve high design in their organization .

Some of expert see there are negative thing may we find them in this style , it is not every design will execute , and they may late not like autocratic style.

This style is very critical for manage conflict in organization because we expect happen conflict inside any project and their possibility will increase at big project, and then in this style the project manager will call every ones to discuss and looking for solves any try to let it positive conflict, so he will hearing from every ones and chose which better for work and collaborate to solve this conflict after face it.

Literature Review :

First one: the democratic style of leadership by kendra chery, on January 06 2020

Said democratic leadership known as participative leadership or shared leadership all These mean participative role in design making process and give their ideas.

This has characteristics like every member can share ideas and opinions and the reader retains the final design, and they members feel more engaged, and creativity is encourage and rewarded. (1)

Second one: democratic leadership ,its advanced and characteristics by Gautam gayan November 21 2020

Said the readers the primary to make decision they make vote role to manage team and sharing design with members.

And said great reader impeccable in problem solving skills. (2)

Methodology:

I search on a group of website and read a lot of litter about this subject, and I compare that with my experiences.

Results and Discussion:

The conflict will be done automatically and there is no project with out conflict, but with using democratic style in project we will share every member and face the conflict as first stage to solve conflict and work with better benefits for the project.
