

Majid Alfelfel's PhD PART-2 Rev.1_English				
	Section	Comments	Responses	Status
1	Research Questions	Consider adding questions that explore the long term impacts of AI adoption on project sustainability. In the end of the introduction last paragraph add lines guiding the reader to the following sections components	Additional question "Q3.1", is added under Major Research Question 3. This paragraph is added in the end of the introduction. "This research explores the factors influencing AI adoption in project management and its impact on project outcomes. The following sections provide a structured discussion, beginning with the research questions and objectives, followed by the theoretical framework, literature review, methodology, and data analysis"	Done
2	Theoretical Framework	It would be beneficial to explicitly connect the chosen theories to the research questions and objectives. For the theoretical models that support the presented concepts, consider the following names: 1. Integrated AI Project Management Framework 2. AI-Driven Decision-Making Theory 3. Sustainable AI Adoption Model 4. Adaptive AI Utilization Theory 5. Collaborative AI Management Paradigm Split the literature review into 2 section one for theoretical part as I mention in the above line and empirical studies Excellent work in page 42, try to brief the result to the direction and significance as well the Study Summary & GAP Analysis	The Suggested theories at the end of "Introductions to the Theoretical Framework" section.	Done
3	Research Methodology	The methodology is well-explained and appropriate for the research aims. Suggestions: Justify the choice of qualitative vs. quantitative methods in the context of the research objectives.	Section 3, added "Research Methodology" and justification is added as well.	Done
4	Sample of the Research	The sample size and criteria are mentioned. Suggestions: Provide more detail on the selection process and demographic characteristics of the sample participants.	The following is added under study sample "Participants will be selected from Saudi Arabia's leading design and consultancy firms. The sample includes project managers, engineers, and decision-makers with direct AI adoption experience. A structured and balanced sampling approach will be used to ensure representation across company sizes, AI maturity levels, and industry sectors".	Done
5	References	Split the reference into two section one for Arabic and one for English	Splited to two sections; Arabic References & English References.	Done
6	Title (suggestion)	since we are studing the factors and outcomes, I modify the Title to cover the outcomes as well, Hence the Title will be as follow	"Factors Influencing AI-Based Project Management and Its Outcomes in Design and Consultancy Engineering Projects"
