(MGM111)

Principle of management

Instructions:

يجب حل الواجب و تعبئته في هذا النموذج وتحويله الي PDF ورفعہ مره اخري للتقيم.
الحل باللغة العربية او الانجليزية.

Instructor's Name: **DR. MAGDY ALHAJ**

(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

First of all, we need to define the function of management and the function of project. Functions of management are planning organizing leading controlling but the function of project are product marketing human resources and finance which are department of an organization. Now let's focus on the planning and it is the process of setting objectives and determining how to best accomplish them with effectiveness and efficiency. We have 3 types of plans:

Long range plans or strategic plans set broad comprehensive and longer-term action directions for entire organizations taken by the top managers

Intermediate range plans or operational plans define what needs to be done in specific areas to implement strategic plans and are made by middle management how are the production marketing finance and human resources that mean the functions of project

For organizing it's assembling and coordinating the human financial physical informational and other resources needed to achieve goals. For this function of management, we start in it with by the division of work then functional departmentalization then link departments. Those departments are the function of project that mean production, marketing, finance and human resources.

For leading is stimulating people to be high performers. It is directing, motivating and communicating with employees.

Controlling is the management function of monitoring progress and making changes.
