Student Answer: (١٥٠ words)

Leaders ask better questions; they work in alignment with the team. They do, review, and plan all the way towards achievement the goals. I want to introduce or company CEO as the leader I want write about. I selected him because of his style of leadership skills. Plus, the physiological safety he provided in the workplace. No one can doubt that such forms of motivation are effective within limits. I remember one situation and the way he does attach the worker's self-interest to the interest of the employer or the group. The leadership styles beings are not machines with a single set of push buttons. When complex responses to love, prestige, independence, achievement, and group membership are unrecognized on the job, they perform at best as automata who bring far less than their maximum efficiency to the task, and at worst as rebellious slaves who consciously or unconsciously sabotage the activities they are supposed to be furthering. This is what I considers to be an effective leadership style in the workplace.
