Saudi Aramco

There are 4 risk for Saudi Aramco they are facing:

- No stability of oil price these days because of Varsity of power resource.**
- Covid-19 affecting the demand of oil.**
- Political issues regarding with OPIC organization Members.**
- Technological transformation.**

1-First Risk instability of the price oil cause weakness to the company considering the company has high dependence regards to oil price to achieve their objectives that leads to weakness to the Saudi economy.

Second risk: Covid-19 has affecting the demand on oil, because most of the countries dealing with this pandemic as full quarantine that s mean a lot of factory are closed.

Third Risk: Saudi Arabia and Russia has conflict about the limitation of oil production that caused a big drop for oil price.

Fourth Risk: Now the world are transforming for using oil to the clean energy, that caused a less demand than before.

2-Type of Risk all the 4 risk consider as control risk.

3- First Risk has high probability of happening because of the world dynamic movement with high impact.

Second Risk: Has already happened and impacted strongly to the organization that lead them to faired 2000 employee.

Fourth risk: will have low probability of happening because of low movement of high technology but if it is happen will have high impact.

4- The company considering many strategy to mitigate this risk by increasing and decreasing of car fuel or airplane fuel in Saudi Arabia to reduce the risk of losing the profit as much as they can, regarding covid-19 the company has new structure for employee payment and faring non-necessary foreign work force.

The new company strategy is to have a Varsity of energy providing, not depending of oil they have expend their business to clean energy like wind energy, sun energy , more investment in petrochemical industries
