Everyone's Smart University

Project (Spring 2021)

Student Name	Ibrahim Al-Assiri	اسم الطالب
Students I.D	2021200187	الرقم الجامعي

Section

Master

Date

Thursday

18 / 03 / 2021.

Course Code

(PMG506)

Advanced project Management

Instructions:

- اخر موعد للتسليم هو يوم الخميس 2021-05-20 في تمام الساعة ٩ مساءً.
- الإجابة متاحة باللغة الإنجليزية أو اللغة العربية مع مراعاة أن تكون المصطلحات العلمية باللغة الانجليزية.
- يتم تسليم المشروع في صيغة ملف pdf مع الالتزام نموذج الجامعة ولن تقبل أي مستندات أخرى.
- يجب مراعاة أقسام البحث الرئيسية (مقدمة Introduction، دراسات علمية سابقة Literature Review، طريقة البحث Methodology، النتائج والمناقشة Results and Discussion ، وأخيراً المراجع References . وان كان هناك ملحقات Appendices يتم إضافتها)
- يجب الالتزام بـ Theme موحد كما يلي:
- حجم الخط 12.
- نوع الخط Arial.
- لون الخط أسود.
- المسافة بين الأسطر line spacing 1.5
- عدد صفحات البحث (لا يقل عن ثلاث صفحات ولا يزيد عن ست صفحات).

Instructor's Name: Eng. Dr. Akram Mustafa

Describe the strategies that are going to be set up to maintain communication with the team members.

1. INTRODUCTION

António Guterres, the secretary-general of the United Nations, also praised civil society and grassroots organizations for the fundamental role they played in fighting COVID-19 at local levels, as he highlighted in the recent *Report on the socio-economic impact of COVID-19*. NGOs, according to him, bring economic and livelihood opportunities and can adapt responses to the community context.

I joined a social campaign named help all serve all last year in the year 2020. This social campaign was based on helping vulnerable and helpless poor who lost their daily bread due to the unprecedented covid19. My duty included going to underdeveloped areas where mostly poor lived and having a proper conversation on how their life has been affected and how they are surviving without any source of income . Being an administrator.

In the wake of this deadly pandemic and the lockdown induced by it, our first thoughts were about how to reach out to our children and their communities. Topmost in our minds were the remotest regions of our operational areas and urban slums, their survival, safety and their health.

We also focused on our awareness generation and advocacy programmes with our target communities and local government bodies, primarily through occasional home visits and mainly through phone calls and messages, in keeping with the social distancing protocols.

It was my duty to reduce their burden both emotionally and financially by taking some measures. The problems included absence of money, shortage of food grains and clean water And if a person got sick there were no beds available in the public hospitals.

All these factors had to be addressed in a short period of time in order to save these innocent lives.

There were some issues that arose while exercising the project of making them better off economically and emotionally.

2. LITERATURE REVIEW

One of the participants in the study, is the auditor general in the Auditor-General (Interviewer 3, 2007: pers.comm.) He commented: "Textbooks provide interesting ideas and explanations. The more you learn, the 'better you get' in leadership groups. However, implementation remains a major challenge for the team Organizations.

Teams are a resource for accomplishing important tasks and bringing satisfaction among members of the organization. In view of the collective importance of groups in organizations, it should also be noted that groups do not always have a perfect track record and team members do not always satisfy them (Schermerhorn et al., 2010).

3. METHODOLOGY

I divided my team in six groups:-

3.1 .Food and clean water suppliers-

- With the help of the team members, the organisation also distributed rations to the poor families whose livelihoods were severely affected by the pandemic. So far, we claim to have distributed more than 28,700 food kits. Each of these kits consisted of flour, rice, pulses, oil, sugar, vegetables, and spices, and were distributed to migrant workers and daily wagers.
- Also distributed food in 3 Covid - isolation centres consist of 100 beds each. Food was being made in the public kitchen. We took permission from the authority for the same.
- During the summer season we are going to distribute water through tankers in the society.

3.2 .Women assistance -

- Because of the lockdown and lack of income, the underprivileged women found it extremely difficult to maintain menstrual hygiene. We distributed sanitary napkins to 25,000 such women in slums and containment areas. During group meetings and counseling sessions on topics related to family planning and menstrual hygiene contraceptives and sanitary napkins were distributed to women and adolescent girls respectively.

- Along with the issue of menstrual hygiene our team was also assisting Pregnant women in our region. During pregnancy immunity is usually low and due to that they can easily get contact with the virus. Apart from that there are many such families where others got contacted with the virus and no one to assist the woman. So for them as well our team was on the field.

3.3 Education of Kids -

With schools closed since March 2020 due to the Covid-19 pandemic, education has taken a big hit. Underprivileged students from rural areas and small towns are facing the biggest hit as schools have turned to online education to fill the gap but most of these children lack digital access to continue their studies. Millions of children from poor families are still struggling to be updated in their studies at par with their urban counterparts even without access to smartphones, internet, laptops or desktops. The staff maintains communication with the schools as needed. A folder is created for each child with all their report cards, educational goals, and career plans.

3.4 Giving employment opportunity-

Based on the various factors of the impact of COVID-19 on global GDP growth, ILO estimates show an increase in unemployment between 5.3 million ("low")

and 24.7 million (“high”) from the low 188 million in 2019. By comparison, the global financial crisis of 2008 to 9 increased unemployment by 22 million.

Our team has been providing financial assistance by providing unemployed workers in homes such as candle making, masks and related work.

3.5. Vaccination volunteers-

Part of our team was helping in the vaccination centres. Due to limited supply of vaccines people were rushing towards the hospitals, So to handle them our team was volunteering the program and helping the Doctors for the same.

3.6. Corona Warrior-

Corona Warrior was a program launched by our team to make them aware about the precautions & safety measures. Also the major role of the team is to help the people who are in contact with covid.

Following are the responsibilities of this team:-

- Providing Mask & Sanitizer to every needy person
- If the person is infected and finds the very slight symptoms then assisting him/her.
- Providing Yoga tips which are very essential to keep lungs strong.
- If the symptoms are serious then we keep in touch with that person and help his/her family during that time.
- Giving the insights and knowledge regarding the policies of Government.

RESULTS AND DISCUSSIONS

The sudden advent of the covid 19 virus has left thousands and millions of people homeless and has left many without jobs. In the wake of this we had responsible citizens and as a n administrator took the responsibility on our shoulders to make the life of these people non sufferable and happy. Thus I divided my team into six teams which were deployed in different sectors including health, education and employment sectors. The success of this project did not come with zero obstacles. There were communication gaps and conflicts among teammates but with constant lessons on teamwork and motivation I was able to handle this project efficiently. In these unprecedented times a poor section of society needs extra care and support not just financially but emotionally too. And we as a responsible youth of the country should bear all the implications and results of the ongoing trouble to make these people's life better and happy.
