(Discuss the retaliation ship between Functions of Management and function of project)

Edit with WPS Office

(ناقش العلاقة بين وظائف الادارة ووظائف المشروع)

The functions of management are Planing- organizing- staffing- directing- controlling.

The functions of project are product- marketing- human resource- finance

So if you have a project you need to start by setting the goals and objectives of this project (what is the product) and how to achieve them and that part is (PLANING) .

Then you have to start (STAFFING) so you get I.T specialist, Finance section, Marketing staff , working staff etc.. and human resources manager to help you with all of that and now we covered three parts of the project functions.

After that, you have to (ORGANIZE) and regulate your resources (both humans and materials) to work the right way.

Later on, (DIRECTING) and (CONTROLLING) them as a leader would help you reach the goal (deliver) of the project.

In conclusion, you cannot achieve the project functions without the management process and functions.
