(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

The first thing is the function of management.

The management is to fully benefit from the materials and the human resources to fully achieve the goal of the organization at the lowest cost we can, with a supporting environment for the maximum productivity.

And we have the planning, organizing, leading and controlling as a function of management.

The second thing is the function of the project.

The Project is the dedication of organizing and managing resources in a way that these resources deliver all the work required to complete a project in time and it can be developed from several different fields.

And it has six phases, Initiation, Definition, Design, Development, Implementation and Follow-up.
