(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

Functions Of Project:

Functions Of Project:

The relationship between Functions of management and Functions of project is that every function from Functions of project processes into the functions of management, I will illustrate it by giving an example.

Suppose a bags manufacturer wants to do marketing for their products, of course the marketing team will create a plan, organize it, lead it, and control it so they will make a plan which will help them avoid mistakes and solve them before happening .

They will set a time period for this plan as well ,they will distribute the tasks and responsibilities to the employees, and then they will motivate them and lead them to do the tasks. Then they will set the basic criteria for the final goal and compare it with what they have planned. They will know whether there is a deficiency or an error so they will learn from thier mistakes and avoid them in the future .

Looking at the previous example ,we will see that for only one function from Functions Of Projects we needed all the functions from Functions Of Management.
