(Discuss the relationship between Functions of Management and function of project)

There is a strong relationship between the administrative functions and the functions of the project, which is the consideration of the functions of the project as an area for the exercise of administrative functions. Where it practices the functions of planning, organizing, leading and controlling to accomplish the work of the project efficiently and achieve the required goals.

For example, the marketing function needs to be planned, organized, directed and controlled in order to regulate the success of its work.

This is how for other project functions (marketing, production, human resources, finance).
