(MGM111)

Principle of management

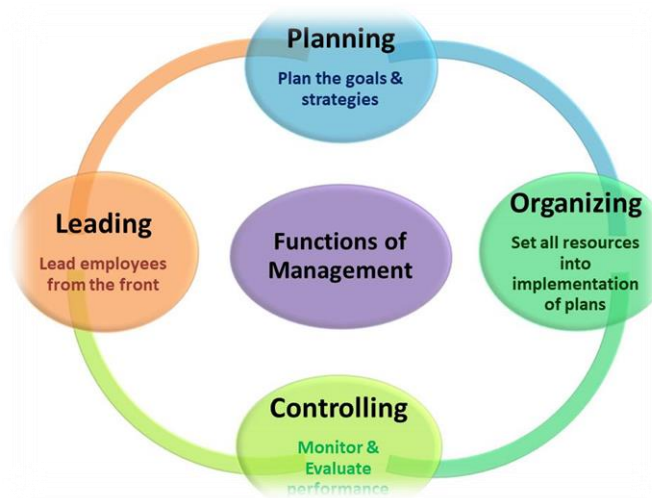

Instructions:

يجب حل الواجب و تعبئته في هذا النموذج وتحويله الي PDF ورفعہ مره اخري للتقيم.
الحل باللغة العربية او الانجليزية.

Instructor's Name: **DR. MAGDY ALHAJ**

(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

The function of management goals it's to focus on the daily routine activities of organization but the function of project its focused on management of project to achieve main objective. The relationships on this is that once you achieve the main objective its means you achieve the organization goals.

The function management is a permanent management process but the function project temporary process i. e.

Terminated and once the objective is achieved its reflect on the organization targets (function management).

The function management have more responsibilities than the function of project

The function management main objective is to maintained and control resources of project within organization like financial backing, skilled employees, production, sales, marketing, etc. unlike function of project his main objective is to develop end product and ensure that project is completing on a given period of time.

Function management also an ongoing process i.e. repetitive process and its manages people, budget and resources unlike function of project its happen on time activity.

In short sentence we could say that is the function of management his main focus in hole organization but the function of project is in one project but this project reflects on the hole organization.
