

There is no explicit section titled "Problem Statement". However, the introduction section sheds light on the problem, so the student may rename the introduction section to "Problem Statement", focusing on the existing problems in the solutions proposed to address the research problem. Furthermore, there is no need to explicitly include subheadings or bullet points; instead, the problem statement should be written in one or more coherent paragraphs. Ensure proper alignment between the research objectives and the identified challenges, and remove the sub-bullets under each objective.

Research Methodology in Computer Science (AI800)

Assignment 2 Rubric

25/30

Weighting: 30%

Criteria	Marks	Description
Problem Statement (14 marks):		
Clarity	4	The problem statement is clear and concise, and the reader can easily understand the research problem. It should be free from ambiguity. 3
Relevance	5	The problem statement addresses a significant research issue or gap in the field, and its relevance to the broader context is evident. 5
Specificity	5	The problem statement is specific and well-defined, focusing on a single, clear research question or issue. 3
Research Objectives (13 marks)		
Alignment	4	The research objectives are directly related to the problem statement and are designed to address the identified research problem. 3
Clarity	4	Each research objective is clearly stated and is easily understood. The objectives should be free from ambiguity. 4
Measurability	5	The research objectives are framed in a way that allows for measurement and evaluation, and it is evident how they will contribute to achieving the research goal. 4
Other criteria (3%)		
Language, Grammar, and typo	3	The text follows proper grammatical rules, including subject-verb agreement, tenses, and sentence structure. Furthermore, text is free from spelling errors, typos, and other typographical mistakes. 3
