

- In the problem statement, emphasize the problems and challenges in the existing solutions.
Include relevant references to support the problem statement.
- For the research objectives:
- Ensuring alignment with the challenges highlighted in the problem statement.
 - Limit the number of objectives to three, avoiding sub-bullets for each objective.
 - Start with the main goal of the research, followed by specific objectives to achieve this goal.
 - Revisit the action verbs used to describe the research objectives
 - Ensure that every objective is measurable. For instance, how the objective #3 and #4 is going to be measured

Research Methodology in Computer Science (AI800)

Assignment 2 Rubric

Weighting: 30%

23/30

Criteria	Marks	Description
Problem Statement (14 marks):		
Clarity	4	The problem statement is clear and concise, and the reader can easily understand the research problem. It should be free from ambiguity. 3
Relevance	5	The problem statement addresses a significant research issue or gap in the field, and its relevance to the broader context is evident. 4
Specificity	5	The problem statement is specific and well-defined, focusing on a single, clear research question or issue. 4
Research Objectives (13 marks)		
Alignment	4	The research objectives are directly related to the problem statement and are designed to address the identified research problem. 3
Clarity	4	Each research objective is clearly stated and is easily understood. The objectives should be free from ambiguity. 3
Measurability	5	The research objectives are framed in a way that allows for measurement and evaluation, and it is evident how they will contribute to achieving the research goal. 3
Other criteria (3%)		
Language, Grammar, and typo	3	The text follows proper grammatical rules, including subject-verb agreement, tenses, and sentence structure. Furthermore, text is free from spelling errors, typos, and other typographical mistakes. 3
