GGI has purchased Data warehouse which helps them to generate reports using the Business Intelligence tool anytime. Higher level management can monitor the progress of the business daily using various dash boards. Also, Finance can do various projection on the business using this Business Intelligence tool.

Claims module is integrated with various third-party system and e-commerce where the Brokers/Insured themselves can Notify claim using their mobile application or login to the portal or using KIOSK.

This solves GGI to do notification for each and every claim which are being done manually.

Also, in case of any mandatory documents required to process the claim the Insured/Brokers can upload using the commerce where it will be integrated to the core system automatically.

The Clients can see the Claim movement and status all the time using Mobile App or through Portal.

E-commerce facilitates the Insured/Broker/Agent to get Policy within short period of time and able to print the documents through their mobile app or portals. Also facilities are available to send Endorsement Request through Portals and Mobile app. Also the endorsement movement can be seen.
