

Python

```
def addBinary(a: str, b: str) -> str:  
    return bin(int(a, 2) + int(b, 2))[2:]
```

Test cases

```
print(addBinary("11", "1"))      # Output:  
"100"
```

```
print(addBinary("1010", "1011")) #  
Output: "10101"
```
