**Master of Project
Management**

Date

01 / 03 / 2021

Course Code

(PMG510)

Project Risk Management

Instructions:

Instructor's Name: Eng. Mosaab M. Hamed

I would like to talk about Saudi Telecom Company (STC) and take it as an example to apply the PRM analysis.

As all of us know, STC is considered one of the leading companies in the Telecom field and well known for each citizen in Saudi Arabia.

Now I'm going to mention the risks which are applied on STC with some details.

When we talk about **compliance risk**, the **liability and user privacy** are the most applied on STC. User data security and liability with all offers and deals must be maintained as they are most effective points from end user perspective. STC has strong and secure data base with great customer service team to manage any customer queries.

Hazard risk is applied on STC when they face a **hack attack** and all singles disappears as the end user no longer can use their mobile phone, as the end user no longer can use their mobile phone.
