- يرجى ضرورة التحويل إلى صيغة pdf بعد الانتهاء من الواجب ورفعته على المودل.
- الحل يكون على هذا النموذج الخاص بالجامعة فقط ولن تقبل أي مستندات أخرى.

Instructor's Name:

Dr. Sara Adel

Assignment (1)

During our study about Leadership, we learned the difference between manager and leader, adding to that we studied traits, and styles of leaders and leadership.

In our first assignment, you will research and write about **a modern project leader** of your choice . Carefully consider his traits, styles, and detect any different situations for his/her leadership in today's organizations.

Your Task

1. Select a leader either a “good example or a bad example.”
2. Research your chosen leader, identifying **evidence** of his/her traits, styles, and leadership situations.
3. Write a **four-paragraph essay** profiling your chosen leader.
 - First, introduce your leader, and state why you selected him/her. Was their leadership effective or not effective?
 - Next, detect the traits and style of your leader, and why you chose that style for him/her?
 - Next, describe the leadership situation your chosen leader was in and so you chose for him that style?
 - Finally, conclude with a short description what is your personal leadership style and how effective it has been for you?

Best of luck..

Answer:

First, I have many good and bad leader examples; however, I prefer to talk about the good example. My leader here is my brother Ali, he is 57 years old and most of my fateful decisions come through him. Specifically, I was studying Engineering in US and I had very hard time with some subjects. I personally decided easily to change my major to Business (HR). Decision has been already made. In that time, I only need someone to just support my decision of changing my career from Engineering path to business path. I decided to call my brother. However, here where the miracle took place, he completely coached me and directly guided me to the correct path which is to be an engineer. His motivation and inspiration in that phone call let me agree to stay as an engineer.

Next, one of his styles is, creating very positive environment. My parent died when I was a child. I grew in my brother Ali's hand with very good environment. I have finished my high school and university by his coaching leadership skills. He taught/coached me how to achieve your goals positively. He knows how to build skills of others.

His teaching and supervising skills made me a very successful person for example, I have completed my study as an engineer, working in one of the biggest petrochemical companies and I am making a lot of success progress in the company, and finally, I am married with very beautiful son and daughter (8 years and 4 years).

Finally, I believe I have a mixed of transformational style and coaching leader style. For example, I like to see some positive changes in a personal life, how? By providing encouragement and inspiration to achieve someone's goal. To be clear more, we had a shutdown in one plant here where I am currently working. The management assigned me to be a leader for the STATIC inspection group. Common of the shutdown to have a service contractor to provide the inspection recommendation requirement provided by the inspection team. One of the service contractor technicians he is certified as a UT level-II. To be an inspector, you need to have some certifications in some APIs (American petroleum institute) code. I have set with him and I encouraged him to have some certifications by providing and coaching him how to study and how to take the exam. It is required to study 8 materials (books). After 8 months, he called me and

informed me that, he is certified as API-510 (In pressure vessel inspection) and API-570 (Piping Inspection). I am very happy that, I have boosted his moral and his inspiration to be a higher level in his career.
