For this assignment I chose Steve Jobs the founder of the successful technology company, Apple. Steve Jobs led multiple outstanding projects during his career on both iMac and iPhone from the mid-1980s to 1990s. He motivated his team to overcome challenges and not dwell on obstacles. His driving force was futuristic-innovation and creativity.

The most important leadership characteristics Jobs had his superior clear vision, his courageousness, and determination. Of his team, he said: "My model for business is The Beatles. They were four guys who kept each other's kind of negative tendencies in check. They balanced each other and the total was greater than the sum of the parts. That's how I see business: Great things in business are never done by one person, they're done by a team of people."

Provided that, I am a firm believer in accepting new challenges, finding innovative ways to solve-problems, and persevere. As an aspired leader, there are risks and consequences we anticipate and shall overcome. Furthermore, one cannot expand their successes without the help of a creative team. You not only need to have a superior team, but also you need to build a strong relationship with your team members, support them when faced with adversities at the place of work, and lead by example.

To sum up, I aspire to be a successful leader such as Steve Jobs and carry similar traits such as communication, integrity, empathy/compassion, competence, delegation, team building, and problem solving. An excellent leader is a kind human as well.
