(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

We apply administrative functions (planning - organizing - directing - control - leadership)

In every function of the project to its success such as finance, human resources, production and marketing

The manager is the one who takes the task of supervising work and administrative functions, planning, organizing, implementing and controlling - either the leader is part of those jobs and the manager cannot succeed without a successful leader .

Identify the existence of consumer needs that require satisfaction, so he works on his part to produce goods or services that meet these needs and makes them accessible to consumers. In order to achieve this, it needs funds to finance the production process and individuals who carry out the production process. Therefore, there are other jobs other than administrative jobs that each facility also carries out to achieve its goal, and it is called the facility or project functions in distinction to it from the administrative jobs.

Is there a separation between the functions of management and the functions of the organization?

This does not mean that there is a separation between the functions of management

And the functions of the organization, on the contrary, we find that there is a natural link between them. When carrying out the burdens of the production or marketing function..etc, the responsible manager must perform all the administrative functions
