PROJECT LEADERSHIP

Faisal bin Abdul Aziz Al Saud

Faisal emerged as an influential leader during the reign of his father, King Abdul-Aziz and his brother, King Saud, and his father assigned him to lead the Saudi forces to calm the situation in Asir in 1922, after his half-brother King Saud was removed from power due to his multiple illnesses. After assuming power, King Faisal achieved a developmental breakthrough on more than one level, defended the Palestinian cause, refused recognition of Israel, and decided with several Arab countries to ban oil exports to countries supporting Israel during the October War.

I chose the leader Faisal bin Abdul-Aziz Al Saud because he has many leadership qualities, and his leadership is also effective.

Among those features that Faisal defines is strength of character, intelligence, quick wit, boldness, the ability to take risks, adventure, courage, possession of vision, bearing responsibility, the ability to plan and formulate constructive and strong plans.

One of the leadership positions that affected me is improving the social level of the Saudi people, in terms of free treatment, free education, and exempting many foodstuffs from customs duties. And the development of the social security system, the system to protect the worker from unemployment, the continuing development of girls' education as well as the advancement of women, so I chose to talk about Faisal bin Abdul-Aziz Al Saud.

As for my personal style of leadership, I see that a successful leader is one whose skills in developing and preparing the plan, and in the way of implementing it, appear. If a person is able to learn the elements of the leadership battle, then he can overcome the major problems facing his life.
