Source, Message, and Channel Factors

Prepared by Dr. Perihan Salah

MKT728

Lecture 4

Learning Objectives

- To study the major variables in the communication system and how they influence consumers' processing of promotional messages
- To examine the considerations involved in selecting a source or communicator of a promotional message
- To examine different types of message structures and appeals that can be used to develop a promotional message
- To consider how the channel or medium used to deliver a promotional message influences the communication process

Persuasion Matrix

Helps marketers see how each controllable element interacts with the consumer's response process

The Persuasion Matrix

Uncontrollable
from marketers

Controllable from marketers

Dependent variables: Steps in being persuaded	Independent variables: The communication components				
	Source	Message	Channel	Receiver	Destination
Message presentation			(2)		
Attention	(4)				
Comprehension				(1)	
Yielding		(3)			
Retention					
Behavior					

Chapter
04

Decisions Evaluated with the Persuasion Matrix

Receiver/
comprehension

Can the receiver
comprehend the
ad?

Channel/
presentation

Which media will
increase
presentation?

Message/
yielding

What type of
message will
create favorable
attitudes or
feelings?

Source/
attention

Who will be
effective in
getting
consumers'
attention?

Chapter 04

CR The more you criticize him the more he performs better next time.

He is well known to handle pressure. (Attention & Yielding)

Source Attention

Attention for Product

Person involved in communicating a marketing message.

- **Direct source** - Delivers a message and/or endorses a product or service (CEO or video for plant is best to deliver msg)
- **Indirect source** - Draws attention to and enhances the appearance of an ad (celebrity)

هشام طلعت مصطفى يكشف سر اختيار موقع مدينة (نور)

Source Attributes and Receiver Processing Modes

Source attribute	Process
Credibility	Internalization
Attractiveness	Identification
Power	Compliance

Source Attributes and Receiver Processing Modes

Source Credibility

- Extent to which the recipient:
 - Sees the source as having relevant knowledge, skill, or experience
 - Trusts the source to give unbiased, objective information
- **Internalization:** *Adopting the opinion* of a credible communicator and the *belief* that information from this source is accurate

(happens in subconscious due to pressure of IMC)

- Enhanced by:
 - Applying expertise and trustworthiness
 - Using corporate leaders as spokespeople (say proofed revenues, profits & sales)
- Limitations
 - High- and low-credibility sources are equally effective when arguing for a position opposing their own best interest (taking money) (pepsi can get researches that isn't harmful)
 - **Sleeper effect:** Persuasiveness of a message increases with the passage of time and pressure

- **Attractiveness:** Characteristic that encompasses *similarity, familiarity, and likability*. (Based on target cust. & market) it makes noise to my voice. So unconsciously identification occurs. I only listen to the source not my voice.
 - **Identification:** Receiver is motivated to seek some type of relationship with the source
 - Adopts similar beliefs, attitudes, preferences, or behavior
- **Attractiveness noise could be –ve or +ve**

- Enhanced by:
 - Applying similarity
 - Using celebrities as spokespeople
 - Understanding the meaning of celebrity endorsers
- Limitations of celebrities as spokespeople
 - Overshadow the product الدحلاب
 - Overexposure
 - Target audiences' receptivity
 - Risk to the advertiser

health and attitude
matches to be Nike figur
and he will not harm my
brand

Comprehending & Recalling

- Source is capable of administering rewards and punishments to the receiver
- Depends on a source's perceived control & concern
- **Compliance:** Receiver accepts a source's persuasive influence and acquiesces to his or her position
 - To obtain a favorable reaction or to avoid punishment
 - Mo Salah has set of beliefs to influence audience

Source Power: Compliance

Message structure

- Order of presentation
- Conclusion drawing
- Message sidedness
- Refutation
- Verbal versus visual messages

Message appeals

- Comparative advertising
- Fear appeals
- Humor appeals
- Sex appeal

- Order of presentation - Strongest arguments should be presented early or late in the message but never in the middle
 - **Primacy effect:** Information presented first is most effective (msg at first moment)
 - **Recency effect:** Last arguments presented are most persuasive (msg at last moment)

قوتك في عيلتك

Depends on:

- Target audience's receptivity to the message

- Length of the message
- Medium used to communicate the message

Msg should be quick on
radio. "on the go, on the
run"

- Conclusion drawing - Messages with explicit conclusions are more easily understood and effective in influencing attitudes

- Depends on:

- Target audience
- Type of issue or topic
- Nature of the situation

Peer pressure effect
& athletes

Sophisticated ad for high end vs easy ad

Introducing
Apple Watch Series 3 (GPS+Cellular)

Conclusion at the end

Conclusion at the beginning

Sophisticated ad for high end vs easy ad

- **One-sided message:** Mentions only positive attributes or benefits, effective if target audience:
 - Already holds a favorable opinion about the topic
 - Is less educated
- **Two-sided message:** Presents both good and bad points, effective when the target audience:
 - Holds an opposing opinion
 - Is highly educated

2 sided msg

- **Refutational appeal:** Communicator presents both sides of an issue and then refutes the opposing viewpoint
- **Verbal versus visual messages** - When verbal information is:
 - Low in imagery value, use of pictures increase immediate and delayed recall
 - High in imagery value, addition of pictures do not increase recall

Recall and Presentation Order

Message Appeal Options

Comparative Ads

- May be especially useful for new brands
- Often used for brands with small market share
- **Frequently use in political advertising**

Fear Appeals

- May stress physical danger or threats to health
- May identify social threats: disapproval or rejection
- May backfire if the level of threat is too high

Humor Appeals

- They can attract and hold attention
- They are often the best remembered
- They put the consumer in a positive mood

Message Appeal Options

- **Comparative advertising:** Directly or indirectly naming competitors in an ad and comparing one or more attributes
- **Fear appeals:** Evoke an emotional response to a threat and arouse individuals to take steps to remove the threat
 - Effective when the recipient is:
 - Self-confident and prefers to cope with dangers
 - A nonuser of the product

Sex & fear appeal

الرقم القوي: ٢٠٧-٤٢٩-٨٤٧

- Protection motivation model - States that ads using fear appeals should give the target audience information on the:
 - Severity of the threat
 - Probability of its occurrence
 - Effectiveness of a coping response
 - Ease with which the response can be implemented

- Humor appeals - Humorous ads:
 - Attract and hold consumers' attention
 - Put consumers in a positive mood
 - Increase consumers' liking of the ad and their feeling toward the product. (*increase bullying*)
 - Distract the consumer from counter arguing against the message
 - **May wear out faster than serious appeals**
 - **Wearout:** Tendency of a commercial to lose effectiveness when seen or heard repeatedly

Humor Appeal

Advantages

- Aid with awareness and attention
- Aid name and simple copy registration
- Aid retention
- Aid persuasion to switch brands
- Create a positive mood that enhances persuasion

Disadvantages

- Harm recall and comprehension
- Harm complex copy registration (creative)
- Do not aid persuasion in general
- Do not aid source credibility
- Not very effective in bringing about sales

Humorous
harm brand

- Personal versus nonpersonal channels - Information received from personal channels is more persuasive than that received from the mass media. (depends)
- Effects of alternative mass media
 - Differences in information processing
 - **Self-paced** - Readers process the ad at their own rate and study it as long as they desire
 - **Externally paced** - Transmission rate is controlled by the medium

- Effects of context and environment
 - **Qualitative media effect:** Influence the medium has on a message
 - Image of the media vehicle affect reactions to the message
- **Clutter:** Amount of advertising in a medium
 - All the nonprogram material that appears in the broadcast environment

To Sum Up...

- Studied the major variables in the communication system and how they influence consumers' processing of promotional messages
- Examined the considerations involved in selecting a source or communicator of a promotional message
- Examined different types of message structures and appeals that can be used to develop a promotional message
- Considered how the channel or medium used to deliver a promotional message influences the communication process
