THE IMPACT OF LEADERSHIP SKILLS ON PROJECT SUCCESS IN **YOUR ORGANIZATION**: A CASE OF YOUR OWN.

Different leadership styles are the key factor in the success of any project. Project Leaders are responsible and accountable for the success/failure of the project. There are numerous responsibilities that are assigned to a Project Leader during the leadership journey.

YOUR MISSION:

Your research/project must provide an overview of information and knowledge in a corporate environment with an underlying theme of **defining leadership styles within applying the hard and soft skills** for that style needed by the leader to ensure successful project delivery in your organization. (You are required to demonstrate your understanding of the relevant body of works to real-life business research).

Choose one only of the following project leadership skills using the tools that we learned during the project leadership course; starting from identifying and assess the case till executing the project.

- Prioritization (Using tools for Estimation – Scheduling – Tracking – prioritizing stakeholders).
- Team management (Using Team structures – Team development stages – Team needs).
- Embracing Accountability (Using RASCI)
- Conflict resolution (Using the Thomas-Kilmann conflict mode instrument).
- Motivation (Using one theory of motivation – Types of motivators).
- Communication in the project.
- Influencing (Using different sources of LEADER POWER).

What you have to do:

Your project task requires the preparation of a full project proposal that should contain the following components:

- **Introduction:** A detailed statement of the problem, research aim, and objectives that you would like to investigate and discuss. **(2 points)**

- **Literature Review and Conceptual framework:** An analysis of the literature relevant to the research topic that will give you the conceptual basis for conducting your research from the previous studies. **(2 points)**
- **Methodology:** Based on the conceptual framework, research aim(s), and objectives, you need to provide a detailed description of the data collection tools, data sources. **(2 points)**
- **Results and Discussion:** Description about the main findings of a research, outline your thoughts to defend your research and to emphasize the significance of it. **(4 points)**
- **References:** Lists all the resources you've used in your project, and your refereed journal articles as well. **(2 points)**
- **Appendices (If it is available in your study):** Any supplementary material you need to add. (Optional)

[Write the names of the chapters/sections of your research/ project and briefly discuss what you will write in those chapters/sections] .

Best of luck...

تأثير مهارات القيادة على نجاح المشروع في مؤسستك: حالة عملية خاصة بالطالب.

أساليب القيادة المختلفة هي العامل الرئيسي في نجاح أي مشروع. قادة المشروع مسؤولون عن نجاح / فشل المشروع. وهناك العديد من المسؤوليات الموكلة لقائد المشروع خلال رحلة القيادة.

مهمتك:

يجب أن يوفر بحثك لمحة عامة عن المعلومات والمعرفة في بيئة المؤسسة الخاصة بك وهي موضع الدراسة مع تحديد أنماط القيادة في إطار تطبيق المهارات الخاصة بالقائد والمناسبة لهذا النمط الذي يحتاجه القائد لضمان تسليم مشروع ناجح في المؤسسة. (أنت مطالب بإثبات فهمك لما تم دراسته وتطبيقه بالأبحاث الواقعية في مؤسستك).

اختر واحدة فقط من مهارات قيادة المشروع التالية باستخدام الأدوات التي تعلمناها خلال مقرر القيادة في المشاريع.

- Prioritization (Estimation – Scheduling – Tracking – prioritizing stakeholders).
- Team management (Team structures – Team development stages – Team needs).
- Embracing Accountability (RASCI)
- Conflict resolution (The Thomas-Kilmann conflict mode instrument).
- Motivation (Using one theory of motivation – Types of motivators).
- Communication in the project.
- Influencing (Using different source of power).

ما عليك القيام به:

تتطلب مهمة مشروعك إعداد مقترح مشروع كامل يجب أن يحتوي على المكونات التالية:

- **مقدمة:** بيان تفصيلي للمشكلة محل الدراسة، تحديد هدف البحث والأهداف التي ترغب في التحقيق فيها ومناقشتها من خلاله.
- **دراسات علمية سابقة:** تحليل الأدبيات والدراسات السابقة ذات الصلة بموضوع البحث والتي ستساعدك في مجال الدراسة لإجراء هذا البحث.
- **المنهجية وطريقة البحث:** بناءً على أهداف البحث، تحتاج إلى تقديم وصف تفصيلي لأساليب وأدوات جمع البيانات ومصادر البيانات والأساليب / الأدوات التي ستستخدمها.
- **النتائج ووصف المناقشة حول النتائج الرئيسية للبحث:** شرح مفصل للمشكلة محل الدراسة.
- **المراجع:** تسرد جميع المصادر التي استخدمتها في مشروعك، ومنها مقالات المجلات المحكمة أو المواقع المستخدمة للبحث.
- **الملحقات** (إذا كانت متوفرة في دراستك): أي مواد تكميلية تحتاج إلى إضافتها. (خيارية).

{اكتب أسماء فصول وأقسام (البحث / المشروع) الخاص بك، وناقش بإيجاز ما ستكتبه في كل قسم}.

كل التوفيق لكم جميعاً.....

1. Introduction:

In this report, I will explain my personal experience through my career life where what we have learned in the course can be seen in real life.

I work in a consultant organization to supervise mega projects in Saudi Arabia, I have been working with multiple teams with different roles. The company policy and the leaders styles plays a big role in my development and motivated me to gain the experience I had now. I will explain the factors that affected my performance in contrast with what we learned throughout the course.

2. Literature Review:

I depended in our course materials, especially chapter 8 and our company policy, in conjunction with my work experience to write this report, where I shed the light to the most important points I experienced in my career life.

3. Methodology:

I have more than 8 years of experience with my current organization. My performance during this period was not stabled. My start was very good then I had some drop in my performance, then I get better again. Then another drop happen where after that I have shined in my department and achieved many goals. What affected my performance? Why it's dropped sometimes and why I'm getting better? And how this can be explained based in the material we learned? This the topics that I will be discussed in this report.

I will focus in McClelland's Three-Needs Theory, Goal Setting Theory, and Equity Theory.

4. Results and Discussions:

1. McClelland's Three-Needs Theory:

This theory stated that three acquired needs are work motivates. One of them is the need for achievement. When I started with my company, I were almost a fresh graduate with experience less than a year. Our department team where small and still the company did not mobilize the whole team based on the project plan. Here I have felt there are a chance to make achievement and reserve a better position in organization chart where we still have empty slots

that will be filled soon with mobilized team. IF I lost this achievement, then I will have no other chance till we move to another project which will takes couple of years. My direct manager felt my need of achievement and indirectly he encouraged this feeling be given me the trust in managing most of the tasks. This need for achievement, energized my performance and I did a great works within my organization. Within 18 months of hard works, I become the youngest team leader in this project and I led a team of 8 Engineers where some of them had more experience than me. After this achievement, I felt drop in my performance where I believe the reason was the absence of motivation factor.

2. Equity Theory:

The theory is telling that when inequities occur, employees attempt to do something about it. The result might be lower or higher productivity.

When I become a team leader, one of the members felt of inequities. Since he was graduated with me from the same school, and he believed that his performance is very high. I have noticed his performance become lower than before. I didn't tell him my notice, but I sit with him and told him, soon our team will be divided, and I believe you should lead the other part. I give him the need for achievement, and convert the inequities feeling to act with higher productivity. Withing 2 years, he become a team leader too.

3. Goal Setting Theory:

The theory stated that working toward a goal is a major source of job motivation. The company started a development plan for potential leaders. The program will be attended by more than 600 Engineers, 20 out of them will be selected for another development plan. Since the company announce about this program, the performance of some colleagues become noticeable high and the productivity increased. It was so obvious which employee looking to achieve this goal. I was one of them who was motivated to perform better.

In conclusion, there a lot of motivation factors in our work environment what we act to it accordingly without the feeling this factor. During our study of this course, we have seen those factor translated into theories.

I may had needed more motivation factors to complete this report/research and produce

it in better way. However, the idea was more than what had been written, but the tight time with our tight schedule dropped the outputs.
