Instructor's Name: Dr. Walaa Mohamed

Question:

Al Baraka Construction Company will start a project to create a residential compound in a new city:

- 1- Put phases of project management and activities that will be done inside each phase from your point of view.
- 2- You are required to identify all the internal and external stakeholders of this project from your point of view.

السؤال باللغة العربية:

ستقوم شركة البركة للإنشاءات ببدء مشروع لعمل مجمع سكني بمدينة جديدة:

- 1- ضع مراحل إدارة المشروع والأنشطة التي ستكون داخل كل مرحلة من وجهة نظرك.
- 2- وحدد كل أصحاب المصالح الخارجيين والداخليين في هذا المشروع من وجهه نظرك.

الإجابة: 1

-1Getting started:

Residential complex in Al-Sharqiyah Al-Manar neighborhood

And because there is no residential villa close to the market and with the facilities available from the state, we decided to establish a residential complex consisting of 6 floors

The majority agreed to be in the north of the neighborhood.

-2Definition:

Choosing a suitable site for the future development of services.

See the details of the city and the municipality's plans to develop services, and based on them, the appropriate site is taken.

The site is chosen for the city planning.

And to distinguish the neighborhood and its sophistication, there are equal roads, proximity to the ring road, and near schools.

-3Design:

Residential building project apartments in the north of the neighborhood because the price is appropriate for the site.

-4Development:

As for the southern neighborhood for high income, you are now targeting a specific group for the project.

-5Execution:

The construction stage consists of three stages: the first stage in drilling and bone formation

It is a building without any construction,

It is a building that does not have either block..

The second stage: for the internal affairs, which is the internal finishing stage.

The third stage: external finishing

And here these are (3) stages in which we always go through most projects..

-6Follow-up

Then comes the advertising and advertisement stage of the site .. The third phase: calculating costs and calculating profits and how much we put our profits on the building .. The fourth stage is the stage of total sale of the project

Answer to the second question:

Of course, the owner, visitors, investors and tenants

And the external interest of the city first and because it adds attracting visitors to the neighborhood and high-earning income
