

The risks facing Saudi ramco	Why is this risk	What type of risk is it ?	What is the likelihood of the risk ? how great is the impact	What strategy or policy does the company use it to manage the risk
H2S gas leakage	Causing the death of people on oil fields	Can be both - Control - Hazard	Death and other serious health issue Stopping the operation	Educating the people how to deal with th situation and set up a critical safety rules and PEE to control the same and to maintain the drilling with the best and safest way
Covid-19 Infection	Because the infection of this virus is very easy and its very deadly	Hazard	Causing series probles to the manpower and reach of causing the death and stopping the operation and all office work	Activating the remote work for all possible jobs and set up very strong safet and health rules in all the company facilities .
Oil price decreasing	Less income to the company	Opportunity	Causing reduce of income to the company which will effect the future growth and causing to decrease the manpower in the company .	Increasing the production and exporting and start to invest eith the solar energy to bring multi income resources
Stuck the drilling pipe	stop the operation down	Control	Causing total shut down of the drilling operation which will cost the company too much time and money	Using the latest technology in (MWD) measurement while drilling to avoid any related matters and using expert companies like schlumberger
