Assignment 1 (Spring 2021)

Student Name: Ibrahim Nadeem

Martin Luther King. He established and lead a movement that was fundamental to the success of ending legal segregation in the United States effectively.

It is clearly that he played variety of leadership styles. He was transformational leader as he made changes to how black people were treated after his speech compared to the situation black people were treated before his speech as well as being a coaching leader to do so.

"I Have A Dream" speech brought awareness and humanity to the national consciousness about Civil Rights. Winning the hearts and minds of the American public, as creating a worldwide following, I chose Martin Luther King because he was foremost a practitioner of the art of Charisma in leadership.

I would like to think of myself as transformational leader which is why I find Martin Luther King is one of the greatest examples of such a leadership. I believe if you have a vision that could be clearly shown and proven to be effective and efficient you could gain most of your team members once you have them believe in the vision as well.
