

Introduction:

Introduce Riyadh as a rapidly developing capital city in Saudi Arabia. Highlight the importance of understanding its development drivers, evaluating urban planning impacts, and addressing challenges for sustainable growth.

Operational Definitions for Research Variables:

Define key concepts: urban planning policies, socioeconomic impacts, sustainable development, inclusivity, and other relevant terms to provide clarity in the study.

Research Design (Research Onion):

Outline your research methodology:

- **Philosophy:** Mixed-methods approach integrating quantitative (surveys, data analysis) and qualitative (interviews, case studies) methods.
- **Approach:** Exploratory to uncover factors driving Riyadh's development and evaluative to assess policy impacts.
- **Strategy:** Case study focusing on Riyadh.
- **Methods:** Surveys for quantitative data, interviews and case studies for qualitative insights.
- **Time Horizon:** Cross-sectional to capture current state and trends.

Research Population & Sampling Methods and Technique:

Detail your target population (e.g., Riyadh residents, policymakers) and justify your sampling approach (e.g., purposive sampling for diverse perspectives).

Data Collection Methods & Types of Data:

Describe how data will be collected:

- **Methods:** Surveys, interviews, case studies.
- **Types of Data:** Quantitative (survey responses, statistical data) and qualitative (interview transcripts, case study narratives).

Literature Review:

Summarize findings from relevant studies:

- Economic growth and infrastructure (Al-Harthy & Al-Shayaa, 2017).
- Urban planning policies (Al-Sadhan, 2018).
- Socioeconomic impacts (Al-Qahtani et al., 2019).
- Challenges in sustainability and inclusivity (Al-Mutairi & Al-Hokail, 2020).

Statistical Analysis Procedures:

Outline statistical techniques to be used (e.g., descriptive statistics, regression analysis) to analyze data and test hypotheses.

Conclusion:

Summarize key findings on Riyadh's development, emphasizing the role of urban planning policies, socioeconomic factors, and challenges such as housing and service demands. Discuss the importance of sustainable development practices and collaboration among stakeholders for future growth.
