Advanced project Management

Instructions:

- اخر موعد للتسليم هو يوم الخميس 2021-05-20 في تمام الساعة ٩ مساءً.
- الإجابة متاحة باللغة الإنجليزية أو اللغة العربية مع مراعاة أن تكون المصطلحات العلمية باللغة الانجليزية.
- يتم تسليم المشروع في صيغة ملف . pdf مع الالتزام نموذج الجامعة ولن تقبل أي مستندات أخرى.
- يجب مراعاة أقسام البحث الرئيسية (مقدمة Introduction، دراسات علمية سابقة Literature Review، طريقة البحث Methodology، النتائج والمناقشة Results and Discussion ، وأخيراً المراجع References . وان كان هناك ملحقات Appendices يتم إضافتها)
- يجب الالتزام بـ Theme موحد كما يلي:
- حجم الخط 12.
- نوع الخط Arial.
- لون الخط أسود.
- المسافة بين الأسطر 1.5 line spacing
- عدد صفحات البحث (لا يقل عن ثلاث صفحات ولا يزيد عن ست صفحات).

Instructor's Name: Eng. Amaal Aburumman

Project:

You are required to document your role in administering a project. The project may be set in a business, social, sporting, or family environment but must be of a significant size and scale. If you do not have an actual project to write about you may complete the project hypothetically. **This report will be between three to six pages in length.** This is a significant research project.

Your report must address each of the following issues:

1. Identify and describe the purpose, scope, and objectives of the project. **Display this information using an appropriate tool.**
2. Describe how the team is given an outline of the project.
3. Describe the strategies that are going to be set up to maintain communication with the team members.
4. Describe the tools that are going to be used to monitor the goals, time frames or milestones.
5. Identify project milestones and activities. **Display this information using an appropriate tool.**
6. Create a budget and link the costs to the key milestones for a project.
7. Describe how you are going to divide tasks and resources amongst a project team. **Display this information using an appropriate tool.**
8. Briefly describe how the progress will be monitored.
9. How are current project records maintained? Who has responsibility for this? provide some recommendations on how this process could be improved.
10. Describe the current procedure for finalizing projects. Create your own procedure and identify how you will evaluate the success of the project.
11. Legislation that may affect the project including health and safety, and anti-discrimination legislation.

Best of luck...

المشروع:

مطلوب منك توثيق دورك في إدارة مشروع. قد يتم تعيين المشروع في بيئة تجارية أو اجتماعية أو رياضية أو عائلية ولكن يجب أن يكون بحجم مناسب. إذا لم يكن لديك مشروع فعلي لتكتب عنه ، فيمكنك إكمال المشروع افتراضياً. سيتمكنون هذا التقرير من ثلاث إلى ست صفحات.

يجب أن يعالج تقريرك كل من القضايا التالية:

1. تحديد ووصف الغرض والنطاق والأهداف من المشروع. اعرض هذه المعلومات باستخدام أداة مناسبة.
2. صف كيف يتم إعطاء الفريق مخططاً تفصيلياً للمشروع.
3. وصف الاستراتيجيات التي سيتم وضعها للحفاظ على التواصل مع أعضاء الفريق.
4. صف الأدوات التي سيتم استخدامها لرصد الأهداف أو الأطر الزمنية أو المعالم.
5. تحديد معالم المشروع والأنشطة. اعرض هذه المعلومات باستخدام أداة مناسبة.
6. إنشاء ميزانية وربط التكاليف بالمعالم الرئيسية للمشروع.
7. صف كيف ستقوم بتقسيم المهام والموارد بين فريق المشروع. اعرض هذه المعلومات باستخدام أداة مناسبة.
8. صف بإيجاز كيف سيتم رصد التقدم.
9. كيف يتم الاحتفاظ بسجلات المشروع الحالية؟ من المسؤول عن هذا؟ تقديم بعض التوصيات حول كيفية تحسين هذه العملية.
10. وصف الإجراء الحالي لإنهاء المشاريع. قم بإنشاء الإجراء الخاص بك وحدد كيفية تقييم نجاح المشروع.
11. التشريعات التي قد تؤثر على المشروع بما في ذلك الصحة والسلامة ، وتشريعات مكافحة التمييز.

مع تمنياتي بالتوفيق..

Advance Project Management

The proposed project title is “Addictive behaviors and psychological distress among young adults.” The proposed project examines how young adults’ identification with a primary peer group that consists of friends mediates the relationship between behaviors and psychological distress. Various research and literature materials suggest that the sense of belonging to a specific primary group is essential as a social resource for youth well-being. However, the sense of belonging to primary groups can be compromised among young adults dealing with addiction. The research projects will also examine the health-threatening behaviors that young adults engage in, which inevitably tend to have an influence on their psychological well-being.

Research aim

The research aims to explain the concept of social identification by explaining how addictive behaviors and psychological well-being tend to differ among young adults in terms of social identification with primary peer group functions.

Research objectives

- To identify the specificity of adjustment of adults with the primary peer group.
- Examining the addiction types of young adults with relation to their social identification with a primary peer group.
- To identify the role of social relationships in the well-being of young adults.

Literature Review and Conceptual Framework

The research paper is developed based on four types of additions discussed in terms of excessive behaviors (Orford, 2001). The four types of addictions examined include alcohol, de rugs, the internet, and gambling. Excessive drinking as an addiction is considered the most common type of addiction among young adults globally (Johnston et al., 2016). For instance, the use and abuse of alcohol are recorded to be more frequent among young adults compared to other substances (Jernigan et al., 2017). When it comes to excessive drug use, various literature analyzed and examined to conceptualize the research paper. The impact of drugs on the health and well-being of young adults and society is examined (Macleod et al., 2004). Most adolescents with

drug use and misuse problems are said to have started using the drugs at much early stage of adolescence or before (Moss et al., 2015). Young adults with drug abuse problems are likely to have substance abuse disorders in their later life.

The examination of excessive gambling aims at finding out the extensive harmful impacts of the addiction on young adults and society (St-Pierre & Derevensky, 2016). The laws that govern gambling activities differ across nations, with the most frequent being the 18-age limit for involvement in gambling (Canale et al., 2016). However, technology has enabled most young adults to engage in gambling activities, something that has grown into addiction (Elton-Marshall et al., 2016). The research also analyzes excessive internet use among young adults. The internet has become a world-changing factor in human life, with almost 40 percent of the world's population having an internet connection (Kuss et al., 2014). The estimation indicates that a young adult with excessive internet users tends to spend more time online than offline, which has a significant impact on their ability identification with a primary peer group that consists of friends. The role of social relationships is also examined in the developed conceptual framework of the research.

Methodology

Participants:

The study involved 900 volunteer young adults aged 15 to 25. The selection procedure ensured the achievement of the demographical balance in terms of gender, age, race, and physical address.

Survey:

An online survey was conducted for three months using the LimeSurvey software.

Measures:

The measurements for the four additions varied. The Alcohol Use Disorders Identification Test was used for measuring excessive alcohol use. Excessive drug use was measured through a five-set question screening for the usage of different illicit drugs. The South Oaks Gambling Screen was used in measuring excessive gambling. The SOGS is widely used in screening gambling behavior in pathological studies. The Compulsive Internet Use Scale was applied in measuring the addiction-related to excessive internet use. The General Health Questionnaire, GHQ-12, was applied in

measuring the psychological distress, while the young adults' identification with a primary peer of friends was evaluated through the subjective sense of belonging to the group.

Results and Discussion

The research creates a connection of how addictive behaviors that intervene with social identification mechanisms can have a huge impact on young adults' psychological well-being. The result of the research study indicates that addictive behaviors affect young adult's psychological well-being. The connection of addictive behavior to social identification is created by examining the effects of various addictions. The research established that the sense of belonging to a primary group could be affected by addiction behavior. For instance, among the individual identified to associate with excessive gambling, drug use, and excessive internet use tend to have a low sense of social identification as it is weekend by the addiction increasing their level of experiencing psychological distress. However, other addictions, such as heavy drinking among young adults, were found to increase the sense of belonging, increasing friendship, and making it easy to make friends with others.
