(You are required to demonstrate your understanding of the relevant body of works to real-life business research).

Choose one only of the following project leadership skills using the tools that we learned during the project leadership course; starting from identifying and assess the case till executing the project.

- Prioritization (Using tools for Estimation – Scheduling – Tracking – prioritizing stakeholders).
- Team management (Using Team structures – Team development stages – Team needs).
- Embracing Accountability (Using RASCI)

- Communication in the project.
- Influencing (Using different sources of LEADER POWER).

What you have to do:

Your project task requires the preparation of a full project proposal that should contain the following components:

- Introduction: A detailed statement of the problem, research aim, and objectives that you would like to investigate and discuss. (2 points)

- Literature Review and Conceptual framework: An analysis of the literature relevant to the research topic that will give you the conceptual basis for conducting your research from the previous studies. (2 points)
- Methodology: Based on the conceptual framework, research aim(s), and objectives, you need to provide a detailed description of the data collection tools, data sources. (2 points)
- Results and Discussion: Description about the main findings of a research, outline your thoughts to defend your research and to emphasize the significance of it. (4 points)
- References: Lists all the resources you've used in your project, and your refereed journal articles as well. (2 points)

أساليب القيادة المختلفة هي العامل الرئيسي في نجاح أي المشروع. قادة المشروع مسؤولون عن نجاح / فشل المشروع. وهناك العديد من المسؤوليات الموكلة لقائد المشروع خلال رحلة القيادة.

مهمتك:

يجب أن يوفر بحثك لمحة عامة عن المعلومات والمعرفة في بيئة المؤسسة الخاصة بك وهي موضع الدراسة مع تحديد أنماط القيادة في إطار تطبيق المهارات الخاصة بالقائد والمناسبة لهذا النمط الذي يحتاجه القائد لضمان تسليم مشروع ناجح في المؤسسة. (أنت مطالب بإثبات فهمك لما تم دراسته وتطبيقه بالأبحاث الواقعية في مؤسستك).

اختر واحدة فقط من مهارات قيادة المشروع التالية باستخدام الأدوات التي تعلمناها خلال مقرر القيادة في المشاريع.

- Prioritization (Estimation – Scheduling – Tracking – prioritizing stakeholders).

Communication in Project management

1. Introduction

Leadership is a concept that is activated by individuals in their personal and professional lives. In order to implement this concept in an effective and worthwhile manner, individuals need to gain an understanding in terms of the meaning and importance of leadership. When they understand the meaning and how this concept will prove useful to them in performing their job duties well and achieving the desired goals, they will put it into practice. The main objective of the leaders is to provide knowledge, support and assistance to their subordinates in performing their job duties in a well-organized and well-organized manner and achieving the desired goals and objectives. When leaders perform their job duties or work with other individuals, they need to inculcate traits of morals and morals and lead to goodwill and well-being. Moreover, leaders need to be well aware in terms of measures and approaches to deal with changes and ensure that they prove effective and beneficial to the members as well as to the organization as a whole. Therefore, it can be said, individuals in leadership positions need to gain an effective understanding of this concept, before they can perform their job duties. The main area highlighted in this research paper is the Communication in leadership. Communication is an essential leadership skill, which means that effective workplace communication and effective leadership are closely intertwined. An effective leader needs to be a skilled interlocutor, applying this skill to relationships at the organizational level, in societies and larger groups, and sometimes on a global scale.

The problem here goes beyond managers who lack the confidence or skill levels needed to be successful business leaders. Instead, leaders who are deficient in the communications department will have a direct negative impact on employee satisfaction levels, motivation, and productivity. Without effective leadership communication in its right place, a leader cannot and should not expect his employees to engage and relate to the workplace, presenting a host of other detrimental effects on business success. Keeping employees motivated and motivated toward success should remain a top priority for any leader. But in order to inspire and motivate in the first place, business leaders need to create and nurture a strong line of communication. As a leader, you need to think clearly, express ideas, and spread information to many audiences. A good leader can handle the rapid flows of information that are circulating within the organization, and between clients, partners, and any other stakeholders. Essentially, maintaining strong leadership connections within the workplace is the key to keeping your business not only afloat, but also thriving in the industry as a whole.

2. Literature

Many studies papers research were put the spot on the communication in leadership and how it has a major impact and it is the core of the leadership.

2.1 QUALITY IN LEADERSHIP COMMUNICATIONS

Arsovski and Nikezic 2012, was discussing in his paper the leadership communications and its quality along with the definition. He described the quality in communications in leadership and how it is important the quality to be applied in the communication as he let us understand that the communication has some standers and one of them the quality [1].

2.2 QUALITY IN LEADERSHIP COMMUNICATIONS

Luthra, (2015) showed that the highest point of effective leader is to have an effective communication skills. And he aimed the communication as it is the main core of a manager playing the leadership methods [2].

3. Methodology

Communication is a essential role in leader. we can say that if there is no effective or right communication methods there will be a poor and useless leadership. The affective and skilled leader in the communication to communicate with team members such as sponsors, stakeholders, the project team will be very important and value to the project. The methodology and technicism for the communications will have some parties :

- Based on communication channels verbal or not, oral or written or based on a style of purpose formal or not, face to face or distance, emails, instant messages, meetings, voice and video calls.

4. Result and Discuss

Projects that come with glitches with communication issues often lead to lack of adoption or frustration, delays and conflict within the workplace. This is why using effective communication methods is so important to project success. Without effective means of communication, it will be very difficult for the project to move forward because the lack of methods will lead to misunderstanding of project objectives and even conflict between stakeholders. Project managers have a responsibility to properly direct the communication process, so that the right people receive the right information. Another important point that project managers must pay attention to is that the information transmitted should be clear, concise and informative. Sometimes, incorrect information may also lead to miscommunication or interpretation by the recipient, which can lead to poor quality work.

Successful Communication	unsuccessful communication
Adopt the changes	The change is not adopted
Facilitate the transmission	complexity
Committed to the project	Team is isolated
High motivation	Motivations will be affected
Effectiveness of work place	Lake of effectiveness and loss of finish tasks
Achieve the goals	Delay the targets of goals
