THE IMPACT OF LEADERSHIP SKILLS ON PROJECT SUCCESS IN **YOUR ORGANIZATION**: A CASE OF YOUR OWN.

Different leadership styles are the key factor in the success of any project. Project Leaders are responsible and accountable for the success/failure of the project. There are numerous responsibilities that are assigned to a Project Leader during the leadership journey.

YOUR MISSION:

Your research/project must provide an overview of information and knowledge in a corporate environment with an underlying theme of **defining leadership styles within applying the hard and soft skills** for that style needed by the leader to ensure successful project delivery in your organization. (You are required to demonstrate your understanding of the relevant body of works to real-life business research).

Choose one only of the following project leadership skills using the tools that we learned during the project leadership course; starting from identifying and assess the case till executing the project.

- Prioritization (Using tools for Estimation – Scheduling – Tracking – prioritizing stakeholders).
- Team management (Using Team structures – Team development stages – Team needs).
- Embracing Accountability (Using RASCI)
- Conflict resolution (Using the Thomas-Kilmann conflict mode instrument).
- Motivation (Using one theory of motivation – Types of motivators).
- Communication in the project.
- Influencing (Using different sources of LEADER POWER).

What you have to do:

Your project task requires the preparation of a full project proposal that should contain the following components:

- **Introduction:** A detailed statement of the problem, research aim, and objectives that you would like to investigate and discuss. **(2 points)**

- **Literature Review and Conceptual framework:** An analysis of the literature relevant to the research topic that will give you the conceptual basis for conducting your research from the previous studies. **(2 points)**
- **Methodology:** Based on the conceptual framework, research aim(s), and objectives, you need to provide a detailed description of the data collection tools, data sources. **(2 points)**
- **Results and Discussion:** Description about the main findings of a research, outline your thoughts to defend your research and to emphasize the significance of it. **(4 points)**
- **References:** Lists all the resources you've used in your project, and your refereed journal articles as well. **(2 points)**
- **Appendices (If it is available in your study):** Any supplementary material you need to add. (Optional)

[Write the names of the chapters/sections of your research/ project and briefly discuss what you will write in those chapters/sections] .

Best of luck...

تأثير مهارات القيادة على نجاح المشروع في مؤسستك: حالة عملية خاصة بالطالب.

أساليب القيادة المختلفة هي العامل الرئيسي في نجاح أي مشروع. قادة المشروع مسؤولون عن نجاح / فشل المشروع. وهناك العديد من المسؤوليات الموكلة لقائد المشروع خلال رحلة القيادة.

مهمتك:

يجب أن يوفر بحثك لمحة عامة عن المعلومات والمعرفة في بيئة المؤسسة الخاصة بك وهي موضع الدراسة مع تحديد أنماط القيادة في إطار تطبيق المهارات الخاصة بالقائد والمناسبة لهذا النمط الذي يحتاجه القائد لضمان تسليم مشروع ناجح في المؤسسة. (أنت مطالب بإثبات فهمك لما تم دراسته وتطبيقه بالأبحاث الواقعية في مؤسستك).

اختر واحدة فقط من مهارات قيادة المشروع التالية باستخدام الأدوات التي تعلمناها خلال مقرر القيادة في المشاريع.

- Prioritization (Estimation – Scheduling – Tracking – prioritizing stakeholders).
- Team management (Team structures – Team development stages – Team needs).
- Embracing Accountability (RASCI)
- Conflict resolution (The Thomas-Kilmann conflict mode instrument).
- Motivation (Using one theory of motivation – Types of motivators).
- Communication in the project.
- Influencing (Using different source of power).

ما عليك القيام به:

تتطلب مهمة مشروعك إعداد مقترح مشروع كامل يجب أن يحتوي على المكونات التالية:

- مقدمة: بيان تفصيلي للمشكلة محل الدراسة، تحديد هدف البحث والأهداف التي ترغب في التحقيق فيها ومناقشتها من خلاله.
- دراسات علمية سابقة: تحليل الأدبيات والدراسات السابقة ذات الصلة بموضوع البحث والتي ستساعدك في مجال الدراسة لإجراء هذا البحث.
- المنهجية وطريقة البحث: بناءً على أهداف البحث، تحتاج إلى تقديم وصف تفصيلي لأساليب وأدوات جمع البيانات ومصادر البيانات والأساليب / الأدوات التي ستستخدمها.
- النتائج ووصف المناقشة حول النتائج الرئيسية للبحث: شرح مفصل للمشكلة محل الدراسة.
- المراجع: تسرد جميع المصادر التي استخدمتها في مشروعك، ومنها مقالات المجلات المحكمة أو المواقع المستخدمة للبحث.
- الملحقات (إذا كانت متوفرة في دراستك): أي مواد تكميلية تحتاج إلى إضافتها. (خيارية).

{اكتب أسماء فصول وأقسام (البحث / المشروع) الخاص بك، وناقش بإيجاز ما ستكتبه في كل قسم}.

كل التوفيق لكم جميعاً.....

THE IMPACT OF PRIORITIZATION SKILLS ON HOSPITAL PROJECT SUCCESS

Introduction:

It has been said that management insists on doing things right and leadership insists on doing the right things. Prioritization is necessary because leaders run out of time and money before they run out of ideas and opportunities. Leaders typically face a big number of advice and ideas from others, so it is critical to know what is most important to tackle first. Poor prioritization leads to project failure and, ultimately, missed business goals. Effort concentration and better financial management are two main reasons why each leader should have prioritization skills. Before performing any work, we must first plan for it, estimate the time that it needs, schedule the estimated work, and finally tracking the work to compare between the actual results and the estimated work.

Literature Review:

The Eisenhower Matrix, or Eisenhower Decision Matrix, is named after Dwight David Eisenhower, an American army general during World War II, who served as the 34th President of the United States from 1953 to 1961. At the beginning of his presidential mandate, facing the USA economic and political internal and foreign orientations, he declares during a conference with his cabinet counsellors the following: "I have two kinds of problems: the urgent and the important. The urgent are not important, and the important are never urgent". From then, the Eisenhower Method emerged, classifying and planning the tasks relatively to their Urgency and their Importance in four descending priorities as follow:

- "Important" and "Urgent" tasks: they receive the highest priority level and should be complete as soon as possible. They are crisis to be solved immediately.
- "Important", but "Not Urgent" tasks: these are the long-term goals and tasks, because they are important, but do not have a firm deadline yet. They should be scheduled in a timely manner and done later.
- "Not Important", but "Urgent" tasks: these tasks can be transferred or delegated to other professionals, because they are trivial than the two precedents.

- "Not Important" and "Not Urgent" tasks: they are most distractive and should be eliminated or dumped, because they could be a complete waste of time.

Two decades after Eisenhower's matrix, Thomas L. Saaty developed the Analytic Hierarchy Process, AHP, between 1971 and 1975. It is a theory and methodology for relative measurement, used to derive ratio scales from both discrete and continuous paired comparisons.

Methodology:

Every healthcare worker in any hospital needs to have prioritization skills because he/she is dealing with people lives.
