MY LEADERSHIP STYLES:

From my link provided for leadership style, I have found my leadership to be " **Democratic Leadership Style**" as my subordinates were 10 Experts in all field of Engineering & Management (Electrical, Mechanical, Architectural, Quality, Safety, Planning, Structural, Roads, materials, Landscape) and about 28 Fresh graduate Engineers who have a team consisting of a surveyor, Quantity Surveyor (QS), and inspector. So I have to be total democratic with the 10 Experts and "**Affiliative Leadership style**". This combination of both leadership was very effective in order to reach the final objectives; that is to make harmony among all team. With this arrangement, I have reached to a successful ending of this hard job with over 50 projects scattered all over Riaydh Area with a difficult client as Riyadh Municipality " Amana".
