2.Literature Review and Conceptual framework

2.1 Leadership

There are variety of leadership style that each manager is following to communicate with his team. Transformational style is making the leader to be powerful and influential leader and lots of admirable. Transformational leader can be adopted to different situation and constantly changed himself to cope-up with those situations. Also, he cared for his team member.

2.2 Communication

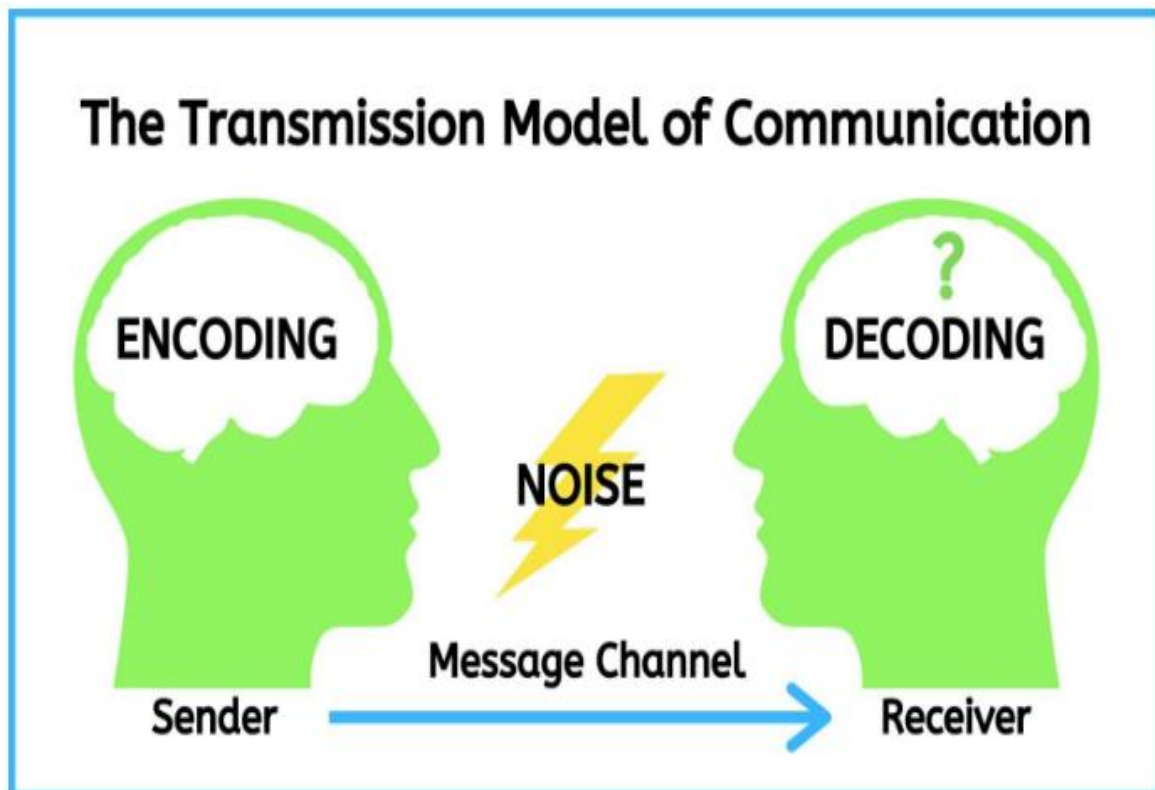

According to an older study, every day manager spent 70 to 90 percent of their time in communicating with their teams and others at workplace. Effective communication act as an advantage of a leader to lead effectively. (Skill, n.d.)

3. Methodology

There different tools and techniques that each leader is using while communicating with his team members which helps in reaching his message in clear way through E-

mails, face to face & meetings. Communicating is the most essential tools in order to transmit the message to the receiver to understand.

communicating skills are also consider as an effective such as listing, confidence, respect, asking good questions, intercultural communication, conflict resolution, presentation skills, negotiation skills & open minded

4. Discussion and results

In my current project, our project manager is using a transformational leadership style by providing regular feedback to their team to keep them regulated in the right direction. This forces better communication, which delivers better results. During one of the communication meeting with our project manager is that of the team members raised his voice unethically and our PM was really politely listening to him carefully to understand his point why he was arguing loudly and the project manager responded please everyone list, so in this case ethical behavior of our project manager plays a large role in a transformational leadership style, which aims to change a company's

corporate values to include higher levels of fairness and justice. This type of leadership gives a wider view of leadership than other methods, while emphasizing the followers' needs, values and morals. An authentic approach to work means team members are always focused on doing the right thing in the right way. (Fletcher, 2021)
