(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

In my opinion the relationship between the function of management and project has its similarities and differences.

First, the similarities between function of management and project that both functions need planning and controlling. However, the type of planning and controlling would be different. For example, in management function usually they use different type of plans such as strategic and operational plan, on the other hand project function they usually use single use plan.

Second, the difference between function of management and project is the consistency. In management function their role would be continuously the same. However, in project function their function and role would be limited in a period of time, and it would end by the end of the project.
