Course Objectives

- To Describe the scope of stakeholder-engagement activities extends from the initiation phase through to project completion.

- To Introduce different activities such as comparing actual performance with planned performance, and analyzing variances as they pertain to project scope, quality, schedule, and cost.

- To Assess the abilities and effectiveness of team members, team building, leadership, motivation, and conflict resolution. Stages and effective actions for developing and utilizing teams and team members are also covered.

- To Describe how to take corrective actions when needed, and how to formally communicate project status to stakeholders.

Learning Outcomes

- Demonstrate how teams are assigned and formed and describe the stages of team development.
- The role of the project manager in team formation, development, and closeout.
- Understanding stakeholder engagement, the types of stakeholders, and their roles, influence, and power• Increasing project-team performance, addressing performance issues, and appraising processes and incentives.
- Analyze the nature of stakeholder groups and summarize their impact on project performance.
- Apply EVM techniques to assess the project cost and schedule.
- Choose from among a suite of appropriate strategies for stakeholder management, and recommend an approach based upon stakeholder strengths and weaknesses, their impact on the project, and other categories of stakeholder characteristics, such as priority and authority.
- Identifying changes to the project baseline.
- Demonstrate mastery of program level competencies.
