(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

Functions of Management: Management in some form or another is an integral part of living and is essential wherever human efforts are to be undertaken to achieve desired objectives. The basic ingredients of management are always at play, whether we manage our lives or business.

Management is a set of principles relating to the functions of planning, organizing, directing, and controlling, and the applications of these principles in harnessing physical, financial, human, and informational resources efficiently and effectively to achieve organizational goals.

1. **Planning:** Process of identifying and selecting appropriate organizational goals and courses of action. Planning is determining the objectives and formulating the methods to achieve them. It is more simply said than done.
2. **Organizing:** Organizing is assembling and coordinating the human, financial, physical, informational, and other resources needed to achieve goals. Establish task and authority relationships that allow people to work together to achieve organization goals.
3. **Leading:** Leading is stimulating people to be high performers. It is directing, motivating and communicating with employees. Articulating a clear organizational vision for its members to accomplish, and energize and enable employees so that everyone understands the part they play in achieving organizational goals
4. **Controlling:** Controlling is the management function of monitoring progress and making changes. Establish measuring and monitoring systems to evaluate how well the organization has achieved its goals.
