(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

The relationships are different slightly as the project management's functions focus on management, planning from initiation till closing the project on a given deadline date. On the other hand, the management's functional is an ongoing process, and it focuses on people, technical, financial, and other resources in order to achieve their goals and objectives. However, the management managers have more responsibilities than the project managers. Therefore, the relationship between their functions is reaching their goals and meeting their objectives by following plans, executing their plans, and closing their tasks by completion.
