(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

Function of Management.

Planning

Planning is determining the objectives and formulating the methods to achieve them. It is more simply said than done. A job well planned is half done.

Leading

Leading is stimulating people to be high performers. It is directing, motivating and communicating with employees.

Organizing

Organizing is assembling and coordinating the human, financial, physical, informational, and other resources needed to achieve goals

Controlling

Controlling is the management function of monitoring progress and making changes

Generally, we can say Management can be defined as a process of planning, organizing, leading and controlling the limited resources efficiently and effectively to achieve predetermined goals and objectives in an ever-changing business environment. The ultimate aim of management is to enhance the organizational productivity and performance.

Function of Project

Product

To ensure operational continuity in order to provide the product as in scope and what instructed from the Management and customer

Marketing

In order to market for the product which, we are offering and get more customer in which will increase organizational's profits and meets Management's expectation.

Human Resource

To provide the needed manpower in order to provide the product as in the scope

Finance

To keep Project's productivity always maintained on the budget

Generally, the function of Project's the responsibility for supporting Project Management in a number of activities including planning, estimating, scheduling, budgeting, forecasting, and performance measurement, evaluation and correction.
