

The research title, “Explainable Artificial Intelligence for Cybersecurity,” is too broad and should be made more specific.

For each reviewed study, clearly present the research objective, methodology, and quantitative findings, where applicable. In addition, include an appropriate in-text citation for every study discussed.

The reviews of Papers 2–6 are too superficial and require further critical development. In addition, the conclusion section should be further improved to provide a stronger synthesis of the key findings and their implications.
