

The function of management & the function of project

*Function of management consist of four wich is :

1 – planning : choose appropriate organizational goals and courses of action to best achieve those goals .

2 – organizing : Establish task and authority relationships that allow people to work together to achieve organization goals .

3 – leading : motivate , coordinate , and energize individuals and groups to work together to achieve organization goals .

4 – controlling : Establish accurate measuring and monitoring systems to evaluate how well the organization has achieved its goals .

*Function of project also consist of four element wich is:

1 – product : the production function is a technical relationship between the amount of inputs that a firm uses and the maximum level of **output** that can be obtained. As such, it is not based on any important behavioral assumption imposed on producers.

2 – marketing : **marketing functions are the activities of buying, selling, transportation, storage, standardisation and grading, financing, risk bearing and circulating market information. Such a list of marketing functions is more suitable to physical products.**

3 – human resource : **responsible for activities spanning a wide variety of core functions. In short, human resource activities fall under the following five core functions:**

staffing, development, compensation, safety and health, and employee and labor relations.

4 – finance : There are two main purposes of the finance function: to provide the financial information that other business functions require to operate effectively and efficiently. to support business **planning** and decision-making.
