(MGM111)

Principle of management

Instructions:

يجب حل الواجب و تعبئته في هذا النموذج وتحويله الي PDF ورفعته مره اخري للتقيم.
الحل باللغة العربية او الانجليزية.

Instructor's Name: DR. MAGDY ALHAJ

(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

The **functions of the management** are multiple and all aim at one purpose, which is to use all available human and material resources and capabilities and exploit them to the maximum possible energies to achieve a specific goal at the lowest possible costs in the most efficient and effective manner through four steps:

1-Planning:

setting goals and paths and determining the necessary period and how possible

2-Organizing:

by setting the organizational structure and defining the responsibilities and tasks required

3-Leading:

by guiding and motivating workers during their work to ensure the safety of implementing the drawn plans

4-Controlling:

assessing the implementation of the plan by the management and correcting any errors or deviations in the project

As for the **functions of the project**, they are the activities related to the nature of the institution's activity, which differ according to the nature of the activity that the institution engages in, but often contain the following departments and activities:

1- Product

2- Marketing

3- Human Resources

4- Financial

5- Research and Development

6- Customer Service

7- Administration

There is a natural link between each of the management functions and the project functions, so when carrying out the burden of a project function

such as marketing, production, or anything else, the responsible manager must perform all the management functions, that is, they are part of each other, and the management functions always work to achieve the goals of the project functions.
