Final Exam: Social Media and Crises (DGM 730)

About Exam Design

- 20 Questions
 - 5 Audio Questions
 - True or False
 - MCQ
 - MCQ- Situations
- 60 mins
- Each question 3 mins

Exam date: الاثنين 4 سبتمبر 2023
من 9 إلى 10 مساءً

Lecture 1

What is a company social media policy?

Social media has become a large part of our everyday lives. Consumers expect brands to have an active online presence and the ability to answer any questions they have fast. But a poorly timed or worded social post could harm your brand reputation. Although people may forgive your brand, the internet never forgets, so it's better to be safe than sorry! Implementing a **social media policy will help protect your company** and give employees the space to advocate for themselves while staying true to the brand and its values.

Understanding copyright and creative commons

What is Copyright?

Copyright grants authors the exclusive rights regarding the use and reproduction of their original work. With the Licensing of the Press Act 1662, the English Parliament addressed the unauthorized printing of books and pamphlets. This legal concept was then adapted by various countries.

Copyright is one of the group of laws under intellectual property which immediately applies to any novel work which facilitates authors' selling activities. However, when an employee gets paid for creating a certain material, the employer often gets the copyright. An infringement of copyright occurs when an owner's product is reproduced without permission. **Copyright registration is not needed in most countries;** however, many authors still opt to register for marketing purposes.

Understanding copyright and creative commons

Copyright law gives creators certain kinds of control over their creative work. If people want to use **copyrighted work**, they often have to ask for permission from the creator.

Creative Commons works within copyright law. It allows creators to grant permission to everyone in the world to use their work in certain ways.

Copyright Symbol

Creative Commons Symbol

Why do you need a social media policy for employees

Promote DEI (Diversity, Equity, & Inclusion) التنوع والإنصاف والشمول
Brand diversity in social media is more important than ever.
Company alignment with **التوافق مع** personal values is 74% more important to consumers than it was in 2021, so brands need to show and tell audiences what the company values.

Amplifying diverse voices via social media is an actionable step brands can take to prioritize representation and attract top talent from marginalized communities. An inclusive social media policy will empower and encourage voices from all backgrounds to advocate for the brand.

Why do you need a social media policy for employees

Minimize legal action against your brand

Social media presents complicated considerations such as privacy law and copyright law. A well made social media policy will protect the company from potential lawsuits.

Consult with your legal counsel and outline a list of do's and don'ts for the company to follow. These rules of thumb will help ensure the organization and contractors are compliant with laws, reducing the risk of legal action against the company.

Why do you need a social media policy for employees

Protect your brand from privacy and security risks

There are many privacy and security risks involved with using social media.

The larger your team is, the larger those risks become. A good social media policy combined with security protocols will protect your accounts against hacking, phishing and fraud accounts.

And since social media is a common resource for scammers and criminals, it's imperative your social media policy includes guidelines that protect both your employees and company. Whether it's defending against phishing scams or ransomware attacks, make sure that everyone in your organization is vigilant about online protection.

Social Media risks and rewards

Some of the most advanced social media topics and benefits include:

Connecting with customers—The ability to **engage with customers** is the most critical aspect of social media. Developing a brand and promoting it through various channels of social media can create further brand value and awareness.

Marketing intelligence—Social media marketing gives the organization the ability to **monitor the brand and listen** to what the public is saying in the social media space.

Lecture 2

What is a Crisis?

Crisis management is literally managing the **ongoing situation**. **Crisis situations can be divided into three stages which are pre-crisis stage, crisis and the post-crisis stage.** For any crisis management the first and most important step is to save lives.

One of the challenges faces leaders is time—time to assess the situation, time to react, and time to repair.

Now, the age of the instant crisis has arrived. Companies, nonprofit organizations (NGOs), governments, and high-profile individuals often seem unable to cope. The ingredients include speed, pervasiveness, and huge numbers.

Example: Verizon adds a \$2 charge, and one-hour later 100,000 signatures appear on a Twitter petition.

Conventional crises which now play-out differently

Whenever an organization is faced with a crisis, it is facing a major threat towards its operations. **During a crisis** an organization needs to find out **the best way to communicate with the public** to manage the situation. Nowadays this includes operating in social media platforms.

Today's **social media tools** are bringing rapid change to organizational communication and public relations. These technologies have **shifted** the emphasis of internet services from being **consumption-based** towards becoming **interactive and collaborative**, creating new opportunities for interaction between organizations and publics.

Crisis created by use of social media

The power of online media means that today's crises emerge at lightning speed, and spread further and faster than ever before. Social media also imposes higher standards of transparency. Incidents which could previously be kept under wraps are now much more likely to become public knowledge (sometimes even before the organization itself is fully aware of them).

To put it simply, a crisis fueled by social media is not something you want to face unprepared. **Social media poses internal and external risks**, both of which could have a **potentially devastating effect** **تأثير مدمر** **on your organization's reputation and bottom line.**

1) Natural Crisis:

- **Disturbances in the environment** and nature lead to natural crisis.
- Such events are generally beyond the control of human beings.
- Tornadoes, Earthquakes, Hurricanes, Landslides, Tsunamis, Flood, Drought all result in natural disaster.

2) Technological crisis:

- Technological crisis arises as a **result of failure in technology**. Problems in the overall systems lead to technological crisis.
- Breakdown of machine, corrupted software and so on give rise to technological crisis.

9) Sudden Crisis: أزمة مفاجئة

- As the name suggests, such situations arise all of a sudden and on an extremely short notice.
- Managers do not get warning signals and such a situation is in most cases beyond anyone's control.

10) Smoldering Crisis: 'الأزمة المتفاقمة'

- **Neglecting minor issues in the beginning lead to smoldering crisis later.**
- Managers often can foresee crisis, but they should not ignore the same and wait for someone else to take action.
- Warn the employees immediately to avoid such a situation.

Social Media Misuse means social media use that is unauthorized, that threatens, humiliates, harasses, or intimidates school-related individuals, disrupts the educational process, and/or violates local, state, or federal law.

Some misuses that are associated with the social media are:

Defamation

التشهير

False and unreliable information

معلومات كاذبة وغير موثوقة

Cyberbullying

التنمر الإلكتروني

Loss of Privacy

فقدان الخصوصية

Fraud

الاحتيال

Lecture 3

How does social media affect a crisis?

Social media is a double-edged sword when it comes to handling a crisis, capable of resolving the situation or making things much, much worse, depending on how you use it. **The vast number of people** on social media means that a single wrong move can harm your brand's reputation in front of literally millions of vocal users.

The levels of Social Media Crisis

The three phases of a crisis

Pre-crisis phase: entails prevention and preparation for a potential crisis and the reduction of the risk of one occurring. This includes creating a crisis management plan, training and preparing a crisis response team and performing tests and drills.

Research showed that organizations generally handle crises **better when they have a crisis management plan** that is updated at least once a year, and a specific crisis management team that exercises it annually.

The levels of Social Media Crisis

The three phases of a crisis

Crisis response phase: looks at the initial crisis response and then reputation repair. After encountering a crisis, it is important to be rapid and accurate.

Researchers suggest that a response should be in place within the first hour after it occurs. The reason is that they have a chance to articulate their side of the story and to stay on top of where the conversation is going.

When addressing the media regarding a crisis, an organization should very carefully select their spokesperson. Ideally, the spokesperson should present information clearly and avoid using technical terms. Further, the spokesperson should appear pleasant, maintain strong eye contact, and no exhibit no visual nervous habits.

The life cycle of Social Media Crisis

The Preparedness and Prevention Stage مرحلة الاستعداد والوقاية

The organizations must at this **stage create an emergency plan** to confront the crisis, and form a crisis management **team**, who has **previous experience** in crisis management as possible.

This stage also includes discovering the weak points in the organization **and developing a plan to confront them**, and identifying the necessary methods and tools necessary to help **confronting the crisis, training employees on how to face** crises, benefit from the lessons of others, develop information about crises and **expected problems**, and **evaluate their** degree of **severity**.

How to analyze a crisis?

Identify the root cause

The first step is to find out what triggered the crisis, how it spread, and who was affected. You can use **tools** like social listening, sentiment analysis, and web analytics **to monitor** the online conversations, feedback, and traffic related to the crisis. You can also interview your team members, customers, and stakeholders to get their perspectives and insights. By identifying the root cause, you can understand what went wrong and how to prevent it from happening again.

The categories of Social Media Crisis

Types of social media crises

Social media crises can even be classified into types:

Multi-channel crisis – extremely dangerous because it has the potential to go viral and generate a great deal of negative publicity very quickly.

Emerging crisis الأزمة الناشئة – If you don't **anticipate and deal with** it as soon as possible, it can quickly escalate into a bigger scandal.

Industry crisis – occurs when a vendor or competitor is experiencing a social media crisis. For example, when many fashion brands are suddenly all attacked for non-transparent actions.

Fake news – in the age of social media, **a post can go viral** in just one click. The ability to detect rumors about your brand quickly is essential.

Lecture 4

Definition of Crisis Communication

Crisis communication research mainly deals with the interrelationships between crisis situations, communication strategies and crisis perceptions.

Crisis communication, when done successfully, can help mitigate يخفف من negative media coverage and manage perceptions both during and after the crisis.

Crisis communication has been broadly defined as “the collection, processing, and dissemination of information required to address a crisis situation”. Also, **crisis communication defined as** “the ongoing process of creating shared meaning among and between groups, communities, individuals and agencies, within the ecological context of a crisis, for the purpose of preparing for and reducing, limiting and responding to threats and harm”

How influencers can help you manage a social media PR crisis

2. Improve the search results for your brand

A timely and well-executed **influencer marketing strategy** can **improve positive mentions** and remarks about your brand. This increases social momentum as the influencer's **audience engages** with the positive content.

Models developed to explain the behavior of PR practitioners in 1970s. **Asymmetrical communication** الاتصال غير المتماثل/غير المتوازن is unbalanced in that the organization tries to change the public and **symmetrical communication** الاتصال المتماثل/المتوازن is balanced in that there are adjustments by the organization and its stakeholders.

There are **four models** of public relations which includes press agency/publicity, public information, two-way asymmetrical, and two-way symmetrical.

1) The press agency/publicity model is characterized as a one-way asymmetrical model of communication, traveling from the organization to the public primarily through the mass media, used as a way of persuading and manipulating a desired audience to act as the organization wishes. (Pure Propaganda)

Social-mediated crisis management (SMCM)

Social media has the potential to one day **contribute to agenda building for public relations practitioners so they must learn to adopt it into their practices.**

Social-mediated Crisis Communication Model

The Social-Mediated Crisis Communication (SMCC) model is also known as the “**social-mediated dialogue**” between organizations and publics during crises.

This model is considered to be the first theoretical model to focus on relationships between online and offline audiences, organizations, social media platforms, and traditional media, before, during and after the crises.

In Social-Mediated Crisis Communication model, both the direct and indirect exchange of information on social media, as well as between traditional media and social media are significant .

Coombs (2014) summarized 10 SCCT communication strategies under **four crisis response strategy clusters** as shown in the Table.

Organizations usually adopt different types of SCCT communication strategies, depending on their belongingness to the victim, accidental, or preventable clusters.

For example, organizations may choose the strategies in the 1) **denial posture** **وضعية الإنكار** to avoid any connections with a crisis. They may also use the strategies in the 2) **diminishment cluster** **تضعف الموقف** to lower a crisis's negative effects. 3) **Rebuilding posture** **إعادة بناء الموقف** allows organizations to re-establish relationships with the stakeholder through apologies or compensations. Strategies in the 4) **bolstering posture** **تعزيز الموقف** enable organizations to build a positive relationship with the stakeholders.

Four crisis
response
strategy
clusters

William Benoit (1995; 1997) developed a **theory of image restoration** to understand how corporations recover from crises. The process of image repair is most often **framed as apologia** اعتذار , or a genre of public apologetic discourse.

Image restoration theory is based on the assumption that image and reputation have both **symbolic and economic value** القيمة الرمزية والاقتصادية , that threats to an organization's image can occur (sometimes frequently), and that **communication can help repair the damage**.

An attack on one's image has two components: 1) an offensive act and 2) an accusation of responsibility for the act. If there is no offensive act or no accusations of responsibility for the act, there is no reputational threat.

Lecture 5

Develop an Integrated Crisis Communications Plan

1. Create a crisis communications team

- **Crisis communications team leader (CCTL):** Responsible for coordinating the team's response, overseeing الإشراف message development, scheduling crisis communications team meetings and facilitating approvals with senior leadership. This may be a senior communications leader within your organization.
- **Crisis communications coordinator (CCC):** In the event of a larger crisis, this person will assist the CCTL with prioritizing the team's responsibilities and project managing a response. They will liaise with all of the communications team leaders: social, PR, internal communication, investor relations, customer marketing, etc. This may be a communications manager from any discipline or your social team lead.

Develop an Integrated Crisis Communications Plan

2. Be prepared for different crisis scenarios

It's impossible to know exactly what crises may come up. **The way** every company had **to handle communications** over the last few years **differed between industries, locations, products** and more.

That's why it's beneficial to you and your company to prepare for different potential crisis scenarios.

Identify what types of scenarios might emerge that could adversely impact your business. **List the types of events that could cause each type of crisis**, as well as the right member of your executive team to help your crisis communications team leader run point.

Acceptable use policies (AUPs) to manage social media use

سياسات الاستخدام المقبول

Developing an AUP to cover social media

- Start by expanding your company's existing acceptable use policies governing email and web communications
- Clearly specify what is acceptable and what is inappropriate to post to social media sites
- State what can be posted during business hours and outside of business hours (if indeed there is any difference). Where there is no differentiation, clearly state this in the policy
- **Let staff know that messages posted to social media sites will be monitored. This is vital**

Factors to consider before posting

1. Identify the message goal

It is counterproductive to create social media messages that do not have a specific goal. Furthermore, **social media message goals** should **reflect** the organization's overall **mission**. Message goals can include increasing **brand awareness**, **creating a favorable perception** of an organization, and **convincing the audience to buy a product**. The goal should be **clearly articulated** in the content. Also, select the social media platform that would be the **most effective** in accomplishing the message goal. Each social media tool has specific characteristics and audiences, which will affect whether the message goals are achieved.

Lecture 6

What is social media accessibility?

Social media accessibility is the practice of designing and developing social media content and posts that provide a smooth, inclusive experience for everyone—including for you, the marketer.

Non-accessible content can cause all sorts of annoying, disruptive مدمرة experiences—like videos with a lot of background noise that don't use captions. Creating more accessible social content is truly a win-win for everyone involved—from you, to your audience.

Assessing and Managing Social Media Issues and Risks

What is social media risk management?

Social media risk management is the process of identifying, assessing, and mitigating risks that stem from social media.

Your brand, customers, and employees are all active on social media.

This means your social channels are a common ground where conversations — both good and bad — and crises can start.

What is **social media monitoring** (and analytics)?

Social media monitoring is **keyword monitoring** on social media platforms to **search for mentions of predefined** **محددة مسبقا** **keywords**. What keywords are worth tracking? In business, they could be connected to:

- Brand
- Product
- Service
- Industry
- CEO
- Competitors
- Marketing campaigns
- Hashtags
- Anything business-related

The Seven Functional Blocks of Social Media

There are **seven functional blocks of social media** that apply to all users across any given platform:

1) Identity, (Identity deals with how users reveal themselves in a social media setting. Most of the information disclosed in this block is personal characteristics of the users such as age, name, gender, profession, and other information that represents them. This identity that is formed, generally happens through expression of what a person likes, dislikes, feels and thinks whether it is done consciously or unconsciously.)

2) Conversations, (This refers to the way in which users' communication in a social media setting, either as a group user or an individual. People communicate daily, using social media for a variety of purposes, often to, obtain information on important topics or to stay in touch with friends and family.)

The Seven Functional Blocks of Social Media

6) reputation, (Organizations need to always keep the public aware of what channels are official, so that information is not misconstrued. **If an unofficial page is perceived to be official by the public and disseminates false or skewed information, this could aid in the damage of an organization's image.**)

7) groups, (This function allows for users to come together as a community for a **common goal or purpose.** Facebook and Flickr for example have the ability to create two different kinds of groups that people can be a part of.)

The following figure shows the functions of social media along with the implication of each function. With the growth and expansion of social media in society in particular fields such as public relations, it is necessary for the academic community to analyze them for patterns that could emerge to help predict future of certain channels of social media in the professional world.

The Seven Functional Blocks of Social Media

Social Media Functionality

Implications of the Functionality

The Seven Functional Blocks of Social Media

- ❑ Social media creates a media of the masses.
- ❑ **Social media** have been classified into these **categories: Internet forums, weblogs, social blogs, wikis, podcasts, pictures and video.**
- ❑ From a public relations perspective, blogs and other forms of social networking are excellent ways to segment the public as groups of individuals who read the same blog or visit the same social networking site as those who share common interests.
- ❑ This **interaction** has resulted in a participatory culture where ordinary citizens can have their voices be heard by the general public and large organizations, if they are listening.
- ❑ Because of these reasons it is time **organizations and public relations** practitioners to pay attention to the online conversations taking part without them and learn ways **to get involved with their online publics.**

Preventing Social Media Risk

1) Guidelines

As general best practice, a high-level overall policy should be rolled out to guide the use of social media by all employees of the organization and any third party acting on behalf of the organization.

The guidelines should highlight key components including:

Scope—Defining the overall scope of the policy guidelines that is set forth by the enterprise for its employees

Purpose—Definition of the purpose of the guidelines for the organization, specifically, how social media activity on behalf of the organization will take place and what sort of information is relevant to share via that activity.

Lecture 7

❑ The importance of monitoring

❑ 1. Build a strong brand

- Media monitoring helps you to see what people think about your brand. Media monitoring enables you to spot any misconceptions so you can take action to correct them.

❑ 2. Manage your reputation and respond to crisis situations

- The monitoring tool will notify you as soon as your brand is mentioned in journalistic or social media. You can even set up app notifications for certain words that would indicate a crisis.

❑ 3. Elevate your brand with key opinion leaders

- Key Opinion Leaders (KOLs) are thought leaders whose opinions are valued in a specific industry. Cooperation with the right influencer can skyrocket your brand awareness and boost your sales.
- Media monitoring helps you to follow the experts, bloggers, “**gurus**” and advocacies in your business and find the best fit for your brand.

How to respond to 'radicalised' customers or stakeholders?

Radicalisation as a four-stage process

- 1) **Pre-radical:** The person joins or identifies with a group or organisation
- 2) **Self-identify:** The person believes and accepts the beliefs and views held by the group or organization
- 3) **Indoctrination:** The person is groomed by the group or organisation pulling them further down the pathway
- 4) **Terrorism:** The person becomes involved in committing terrorist acts

What is digital activism? and who are digital activists?

Grassroots is a type of movement or campaign that attempts to mobilize individuals to take some action to influence an outcome, often of a political nature.

- ❑ **Digital activism**, also known as **cyberactivism**, form of activism that uses the Internet and digital media as key platforms for mass mobilization and political action. **التعبئة والعمل السياسي**.
- ❑ Digital activism (D.A.) refers to political activism on the internet or political movements relying on it.
- ❑ Digital activism has proved to be a powerful means of grassroots political mobilization and provides new ways to engage protesters. Additionally, online actions can be important in countries where public spaces are highly regulated or are under military control. In such cases, online actions are a better option than possibly physically dangerous “live” actions. **E.G. The Arab Spring**

Cyberactivism is the process of using Internet-based socializing and communication techniques to create, operate and manage activism of any type.;
social media for social change refers to social software applications

What is digital activism? and who are digital activists?

Smart mobs is a large group of people mobilized by social media to meet in a public place typically for the purpose of social or political protest.

- ❑ From the early experiments of the 1980s to the modern “**smart mobs**” and blogs, activists and computer specialists have approached digital networks as a channel for action.
- ❑ **Initially, online activists used the Internet as a medium for information distribution, given its capacity to reach massive audiences across borders instantaneously.**
- ❑ A more-developed undertaking of digital activism used the World Wide Web as a site of protest that mirrors and amplifies off-line demonstrations. Some forms of digital activism are e-mail and social-media campaigning, virtual sit-ins, and “hacktivism” (disrupting Web sites).

Lecture 8

A Real-time Monitoring Dashboard

What is a social media monitoring dashboard?

- ❑ **Social media monitoring dashboards visualize important performance metrics for a brand's marketing efforts on social media.** This includes followership, organic performance, the performance of paid advertising, and the visibility of their brand through 3rd party content and discussions (otherwise known as social listening).
- ❑ A social media management dashboard is a tool used to track, measure, and analyze the performance of your social media channels, all in one place. It can help you understand everything from follower growth to competitor intelligence to social sentiment.

Why So Popular?

- ❑ Authentic viewpoints, Grassroots opinion, Unprompted views, Can be cheaper than surveys, focus groups, Consumers not “expecting” marketers and researchers to be listening.

A Real-time Monitoring Dashboard

- ❑ **Real-time dashboards** لوحات المعلومات في الوقت الفعلي are a form of visualization that automatically updates the user's screen with relevant information based on the latest available data. In other words, a real-time dashboard is a graphical user interface with a simple display that visualizes performance indicators and essential metrics crucial to specific business processes, functions, and objectives.
- ❑ A live dashboard is a performance tool used to analyze, track, and report on the company's data in real time with the help of interactive data visualizations.
- ❑ These real time dashboards are automatically updated and provide the user with instant access to critical data.

3 key advantages to having good social media management

1: Effective platform management saves time

- ❑ You will probably have one or two key platforms you primarily focus on (let's say, Facebook for advertising and support and Twitter for building brand awareness). Still, you can't afford to skip the basic hygiene factors on some others (for example, your LinkedIn company page), which means switching costs.
- ❑ When you publish or respond in multiple channels without a cohesive plan, this will create unnecessary costs, loss of focus, and poor follow-through. You can invest in a tool to manage all platforms in one place. This keeps you focused on an actual strategy and reduces switching costs to help you act faster.

Social Media Monitoring Tool

An Example: Crowd Tangle

FOLLOW

Easily follow public content across Facebook, Instagram and Reddit.

ANALYZE

Benchmark and compare performance of public accounts over time.

REPORT

Track referrals and find larger trends to understand how public content spreads on social media.

Examples of tools

10 brand social media monitoring tools (Free & Paid)

1. Hootsuite
2. Nexalogy
3. Mentionlytics
4. Reputology
5. Tweepsmat
6. Reddit Keyword Monitor Pro
7. Talkwalker
8. Sprout Social
9. Agora Pulse
10. **Crowd Analyzer** (Arabic Media Monitoring Platform)

Lecture 9

How to Build Social Media Strategy?

1. Select Relevant and Realistic Social Media Marketing Goals

- ❑ One of the most significant problems faced by many businesses engaged in social media is that they have never spent the time to set relevant and realistic social media marketing goals. They know they need to be on social media, but have no idea why they are there.
- ❑ Of course, your social media marketing plan needs to fit into your business planning as a whole. Ideally, you will have set strategic goals for how you want your business to progress. Your social media marketing goals should complement your overarching business goals.

1. Select Relevant and Realistic Social Media Marketing Goals

❑ Suitable Social Media Goals Could include:

- ❑ Increasing brand awareness
- ❑ Achieving a set higher quantity of sales
- ❑ Improving your ROI
- ❑ Driving people to increase in-store sales
- ❑ Grow your fan base

Goals have 5 elements SMART

Specific	Measurable	Attainable	Relevant	Time-Bound
Make sure your goals are focused and identify a tangible outcome. Without the specifics, your goal runs the risk of being too vague to achieve. Being more specific helps you identify what you want to achieve. You should also identify what resources you are going to leverage to achieve success.	You should have some clear definition of success. This will help you to evaluate achievement and also progress. This component often answers how much or how many and highlights how you'll know you achieved your goal.	Your goal should be challenging, but still reasonable to achieve. Reflecting on this component can reveal any potential barriers that you may need to overcome to realize success. Outline the steps you're planning to take to achieve your goal.	This is about getting real with yourself and ensuring what you're trying to achieve is worthwhile to you. Determining if this is aligned to your values and if it is a priority focus for you. This helps you answer the why.	Every goal needs a target date, something that motivates you to really apply the focus and discipline necessary to achieve it. This answers when. It's important to set a realistic time frame to achieve your goal to ensure you don't get discouraged.

4. Understand Your Social Media Audience

- ❑ Not all social media audiences are alike. Different types of people use social media in varying ways. If you're going to meet your goals, you need to be using the same social media networks as your target audience. Similarly, **if you intend to engage in influencer marketing, you need to ensure that you engage influencers whose audience matches your target market.**

8. Plan the Types of Content You Intend to Share

- ❑ Of course, to be successful on social media, you will need high-quality content to share. One of the biggest mistakes that businesses do is to share excessive promotional material. Remember, social networks are designed to be social – they were never intended to be a marketplace for you to sell your products.
- ❑ Therefore, you need to balance the content you share socially, to be a mixture of informative and entertaining items, with a small percentage of promotional material added in. You will also need to like and share other people's content.
- ❑ This is probably the most significant reason that most influencers gain that status. They know their audience well and create the perfect content to interest their followers. As a brand, you need to do the same.

17. Consider Working with Brand Advocates

- ❑ You might already have access to keen and eager people who are happy to promote your brand on social media. You can include these brand advocates in your social media marketing strategy. They may not have the same reach as the top influencers in your niche, but some will already have sizeable audiences and solid reputations, and you have the added advantage that they already know and like your product.
- ❑ **Brand advocacy** simply means that the **people who love your product or services continue to show support for your brand by promoting your organization** organically to new audiences. Your brand advocates can play a significant role in word-of-mouth marketing and drive new business by being enthusiastic fans of what your company does.
- ❑ Brand advocates can include your executive leadership, company partners, employees, and existing customers.

Lecture 10

- ❑ The use of social media has increased in the world of communication, with Twitter and Facebook as the most used platforms, and organizations have gained mileage by using it to communicate in a much more effective and fast way with their customers about their businesses as well as responding to queries and questions.
- ❑ However, in as much as the emergence of social media has brought in the advantage of fast, effective communication, it has also given room for the fast spread of negative. An organization depends on its reputation, it is a pertinent aspect الجانب ذو الصلة that directly translates to its financial achievement, and with the emergence of social media, crisis might arise and spread faster than it can ever do on any other traditional forms of communication.

- ❑ Therefore, the success of any organization is highly dependent on what it says or the effort it makes after a crisis strike.
- ❑ For this reason, crisis management helps the companies in being able to address issues that threaten its reputation.
- ❑ It has been suggested that it is paramount for organizations to understand fully how to manage different kinds of crisis via social media.
- ❑ Wang (2015) observes that social media has been utilized for public relations since its advent in 2004, and this has had an influence on both individuals and the society.

- ❑ Organizations communicate in two directions: internally to staff and externally to clients, customers, shareholders, stakeholders, the media.
- ❑ **Faulty internal communications can lead to mistakes, discouraged and unhappy staff, employees leaving the company.**
- ❑ Poor external communications can damage image and sales. It really is that simple. Any overall management strategy needs a communications plan or the whole operation might fail.
- ❑ A communications audit analyzes an organization's practices to reveal how effective they are—throughout a whole company or in specified parts of the organization. It can pinpoint problem areas such as frequent misunderstandings, information blocks, information lacks, information duplication, misrepresentation. An audit could be part of a periodic health check, but it is especially helpful at a time of change: a merger or acquisition, launch of a new product or service, entry into new markets, for example.

- ❑ This is due to at least two characteristics of influencer communication:
First, many influencers strive to monetize their status as micro-celebrities.
Second, influencers combine functions that different actors have fulfilled previously, e.g. creative agencies, advertising media, journalistic media, testimonial givers, and opinion leaders. This intermingling of functions in just one actor implies that routine procedures that are tailored to mono-functional actors may fall short.
- ❑ **For example**, organizations have to approach travel influencers differently than travel journalists.
- ❑ Due to these two characteristics, organizations' communication departments and their agencies are confronted with the task of adapting their routines to influencer communication or even developing new routines.

☐ Relationships & Preparation

**Good media relations begin
long before you are contacted.**

- ☐ Draft and implement a media policy.
- ☐ Educate employees on the policy.
- ☐ Identify and train a lead spokesperson.
- ☐ Establish relationships with reporters.
- ☐ **Know your Target Audiences.**
- ☐ **Develop and know your Key and Secondary Messages.**
- ☐ Anticipate and prepare for questions.
- ☐ Answer questions with your messages.

**No comment is usually no good.
If you hide from the media, most people
will suspect that you have something to hide.**

☐ Develop Your Messages :

**What you say will have an effect on each target audience.
So, what do you say?**

Key Messages

- ☐ **The Key Message is applicable to any audience.**
- ☐ The Key Message should register an immediate impression.

Secondary Messages

- ☐ **Secondary Messages are customized for specific audiences.**
- ☐ Develop your messages before you talk with a reporter.
- ☐ Rehearse and repeat them during the interview, no matter the question.

❑ 2. Communicate, communicate, communicate.

The first rule of crisis management is to communicate. Early hours are critical and they set the tone for the duration of the crisis. The media's first questions are likely to be simple and predictable:

5 Ws & H?

What happened? What are you doing about it?

Why happened? Were there warning signs?

Where?

When did you know of the problem?

Who's to blame?

How will life or property be protected or compensated?
