العام الدراسي:

2024

In the year 2019 a virus has been born in this world and started to be spread so fast that the world could not control it. This virus is called COVID19 and, it stands for Corona virus disease that happened in 2019.

When the virus started spreading countries started to close their borders in order to stop the spreading of the virus and Saudi Arabia is one of the most countries who closed their borders in order to stop the spreading of the virus, however on February 2019 an order came from his royal highness king Salman bin AbdulAziz saying in Arabic language that this virus is spreading so fast that even hospitals around the world could not control it. After that the government of Saudi Arabia ordered their Saudi people and residents to stop going to school and going to work until this virus spreading needed to be controlled in another word it was called pandemic.

From that point all institutes' CEOs sent announcements to all employees and trainees to not come to the organization, so no one got infected and started working online. This was a big challenge for the employees of the institutes and EnergyTech is one of them. Because some lessons needed to be delivered inside a class or a workshop.

Last, Challenges show the problem of working remotely and how to deliver the courses. Moreover, this research paper will focus on the employees of EnergyTech and how they overcame this challenge.

Last, I will use a survey question and see how they controlled the work during the pandemic of COVID19.

مشكلة الدراسة:

In this research it will explain how it was difficult to deliver the course to the audience, because this something new that happen to the world

أهمية الدراسة:

The reason to do this research is that I want to know in case of any crises god forbid will any organization able to control the progress of business for example a new disease came to the world and made us need to work remotely. Can organization like EnergyTech will handle it.

أهداف الدراسة:

This research is trying to achieve that in case of any lockdown the employee continue to work at home with no problem. Also If the lockdown is over it is easy to go back to work and continue what you archive at home.

تساؤلات الدراسة

- 1.what is the level of progress can be delivered during of working remotely and do it take longer time?
2. is working at home is harder than working inside the organization?

فروض الدراسة:

The first assumption: people believe that working remotely is not good and it is just a waste of time with no progress and learning

The Second: people believe that working remotely is good and it is not a waste of time with progress and learning

After reading research in in the same topic it was found that:

1. Edeh Michael Onyema, Dr. Nwafor Chika Eucheria, Dr. Faith Ayobamidele Obafemi , Shuvro Sen, Fyनेface Grace Atonye, Dr. Aabha Sharma and Alhuseen Omar Alsayed

Impact of coronavirus Pandemic on education (2020)

The study investigate the impact COVID-19 on education and it was collect from 200 participant between teachers and student ,parents, and others. The study shows the damaging from COVID-19 on education sector and it need the technology to be_ obtained inside schools and organization.

2. **Christine Syrek**, Jana Kühnel, Tim Vahle-Hinz, Jessica de Bloom

Being an accountant, cook, entertainer and teacher—all at the same time: Changes in employees' work and work-related well-being during the coronavirus (COVID-19) pandemic
