Recently there has been a lot of talk about the Crown Prince of Saudi Arabia Mohammed bin Salman. To begin with, I chose to write about the crown prince Mohammed bin Salman and his reforms because he is one of the great leader in Saudi Arabia and in our nation. I believe that the crown prince is an effective leader because of his reforms such as reshape the nation's economy. In addition to that so, the Crown Prince has made a lot of changes in the Kingdom of Saudi Arabia in terms of allowing women to drive cars in public, and allowing women to attend public arena. He has started what it is called Vision 2030, which will help Saudi Arabia to move forward to diversify the economy away from oil, and let Saudi Arabia a country that depends more many things such as technology, manufacturing, and banking.

I personally believe that the Crown Prince Mohammed bin Salman is a hero to a lot of people in Saudi Arabia because of his social reforms. First, the Crown Prince is working hard to return Saudi Arabia to a nation of moderate Islam, where everyone is welcome. He also reduced the power for the people who had a reputation of abusing their authority. However, the Crown Prince wanted to open new entertainment areas for the people of Saudi Arabia in order to let people enjoy, and have a better life.

I would describe the Crown Prince Mohammed bin Salman as a courageous leader who will make a big change in Saudi Arabia and in our nation. He has the power and the resources that will help him to be able to achieve his dreams. In addition, the Crown Prince is behind a lot of modernization projects, and he is a leader who

understands that oil is eventually going to run out in the future, and that is why he is moving very fast on his reforms.

As Saudi citizen, I would conclude this by saying that the Crown Prince is doing great things for all the people, and I respect the Crown Prince very much because of his dedication to education. He is a real leader that know how much is important to have an educated population, and all the Saudi people are aware that the Vision of 2030 required people to be educated with high level of degrees in order to become a reality, and benefit the nation. Lastly, I have seen many great things from the Crown Prince Mohammed bin Salman that help me to push myself to work hard every day. I am very proud of the Crown Prince because he will make Saudi Arabia a better place to live and work.
