Evidence-based cybersecurity policy? A meta-review of cybersecurity interventions — Woods & Seymour, 2023/24.
<https://doi.org/10.1080/23738871.2024.2335461>

Focus and Key Findings:

Meta-review of empirical studies of cybersecurity controls & policy. Found that how controls are implemented matters more than mere adoption.

Identified Gap:

Limited causal policy-impact studies; lack of standard evidence base for policy design.

Research Title : البحث العلمي

Cybersecurity and the politics of knowledge production — Cristiano, 2023. Taylor & Francis
<https://www.tandfonline.com/doi/epdf/10.1080/23738871.2023.2287687?needAccess=true>

Focus and Key Findings:

Critiques the state-centric production of cybersecurity policy knowledge; questions reflexivity and power in policy research.

Identified Gap: Under-explored perspectives (non-Western, non-state actors); normative bias in policy research.

Research Title : البحث العلمي

A Comparative Study of National Cyber Security Strategies of ten nations — Odebade & Benkhelifa, 2023..
<https://arxiv.org/pdf/2303.13938>

Focus and Key Findings:

Compares national cybersecurity strategies across 10 countries (Europe, Asia-Pacific, America). Finds diversity in content and structure; lack of unified framework

Identified Gap: No unified definition; insufficient longitudinal evaluation of strategy outcomes.
