(MGM111)

Principle of management

Instructions:

يجب حل الواجب و تعبئته في هذا النموذج وتحويله الي PDF ورفعہ مره اخري للتقيم.
الحل باللغة العربية او الانجليزية.

Instructor's Name: **DR. MAGDY ALHAJ**

(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

Function of management is planning, organizing, staffing, directing and controlling.

Function of project is product, marketing, human resource, and finance.

The relationship between management functions and project functions is an integrative relationship it means that the project will be success only if we used all function of project. to success all function project we must apply all function of managements.

Whereas, the functions of management aim at creating a work environment and using the human, financial and marketing capabilities to the maximum use, and that is in order to develop and improve the objectives of the project and that is at the lowest costs, and there must be planning, organizing, leadership and control over individuals and the project.

As for the project functions, it is a group of different activities according to the nature of the activity, project, or institution to be performed, and thus more efforts must be made to achieve the maximum level of success.

In order to success the project we must use both because each of function of management and function of project are complete each other. it is very hard to continue the project unless we apply all the function.

The main goal of the managements is used the project functions to meet the goals of the project.
