First of all, we need to set a plan for this project and discuss it with the management with clear vision and mission, also I will set a meeting with the project team to take their opinions if we need to change in the operational plan and giving everyone his tasks and responsibilities.

Moreover, I need to explain the procedures and protocols of our communications to the team members, for sure we need to clarify every department responsibility in order to manage the communications between the departments for the processes of the project.

From my point of view, I hope to give an emotional intelligence course for the team members to be self awareness first and social awareness with their colleagues. I am sure this course will minimize the conflicts and giving more control to manage the conflicts between them.

However, I highly recommend to make MBTI personality types exam for the project members before assigning them to teams and make every team diverse to outcome the best results.

Finally, as a project manager more than 70% of my duties is to manage the project communications with the shareholder, management, suppliers, subcontractors, employees and clients. These communications could be verbally, emails, reports, meetings... etc.

Yours sincerely,

Eng. Hussain Abdu
