PROJECT LEADERSHIP

I choose one of my inspiring ideal man who positively impacting on me these days. He is a physiotherapist (Mohammad Moslim). His leadership style is a Coaching Leadership Style which influence on me and my career life too. he is such a perfect coach and organized motivator who loves to work with and under his supervision. Additionally, he supported me to improve myself individually and be a good therapist at work and even though it takes a long time to achieve good results for such a new therapist at public hospital. So that's why I choose him, he is an excellent example of what I wanted to be in the near future. and he's my coach right now. In the end of this essay I choose my preferred style of leadership which is Transformational Leadership Style because I would like to divine the goals and what I should do to make a positive vision for the physiotherapy future. Moreover, positive influencing on the team by sense of purpose and an excitement

atmosphere for our jobs which usually leads to stimulate and inspire the team to achieve their extraordinary outcomes.
