(Discuss the retaliation ship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الادارة ووظائف المشروع)

The Functions of Management is a process of planning, organizing, leading and controlling the limited resources efficiently and effectively to achieve predetermined goals and objectives in an ever-changing business environment. Also, the people responsible for supervising the use of an organization's resources to meet its goals. So, to achieving the greatest possible It is possible to collaborate on the project through: -

- 1- Planning: choose appropriate organization goals and courses of action to best achieve those goals institution within a specific period of time.
- 2- Organizing: Establish task and authority relationships that allow people to work together to achieve organization goals.
- 3- Leading: By motivating and energize individuals and groups to work together to achieve organizational goals.
- 4- Controlling: Establish accurate measuring monitoring systems to evaluate how well the organization has achieved its goals.

The functions of project are important because it ensures proper expectations are set around what can be delivered, by when, and for how much. Without proper project management, budget estimates and project delivery timelines can be set that are over-ambitious or lacking in analogous estimating insight from similar projects.

The relationship between Functions of Management and function of project is in the Functions of Management for example in accounting and finance department will deal with all Planning, Organizing, Leading and Controlling.
